this book is an exploration of how urban life in copenhagen in the period known as the golden age c 1800 to 1850 was experienced and structured socially institutionally and architecturally it draws on a broad historical source material spanning urban anecdotes biography philosophy literature and visual culture to do so the book argues that copenhagen emerged as a modern city at this time despite the fact that the golden age never witnessed the appearance of the main characteristics of the modernisation of cities associated with industrialisation such as street lighting sewer systems and railroads the book outlines the historical and topographical context of copenhagen in the golden age with a special focus on the works of the most prominent architect of the period c f hansen the characterisation of the city is complemented by investigations into writings of three citizens the philosopher søren kierkegaard the novelist thomasine gyllembourg and the criminal ole kollerød who all take an interest in the city s institutional and urban structures as well as their own place in it from these different sources a picture is painted of urban life and thought at a time when the city began to take on characteristics of ambiguity and alienation in european thinking while at the same time the city itself retained some pre modern motifs of a symbolic order this transformation is set in a larger process of cultural re orientation from traditional baroque culture to what might be termed romantic culture the book reconsiders the significance of this transformation for the emergent order of the modern european city in the nineteenth century and thus of the very foundation on which our own urban culture rests

drawing on the work of hannah arendt and theodor w adorno this book illustrates the relevance and applicability of a political discussion of guilt and democracy it appropriates psychoanalytic theory to analyse court documents of austrian nazi perpetrators as well as recent public controversies surrounding austria s involvement in the nazi atrocities and ponders how the former agents of hitlerite crimes and contemporary austrians have dealt with their guilt exposing the defensive mechanisms that have been used to evade facing involvement in nazi atrocities leeb considers the possibilities of breaking the cycle of negative consequences that result from the inability to deal with guilt leeb shows us that only by guilt can individuals and nations take responsibility for their past crimes show solidarity with the victims of crimes and prevent the emergence of new crimes

in legal interpretation where does meaning come from law is made from language yet law unlike other language related disciplines has not so far experienced its pragmatic turn towards inference and the construction of meaning this book investigates to what extent a pragmatically based view of l linguistic and legal interpretation can lead to new theoretical views for law and in addition to practical consequences in legal decision making with its traditional emphasis on the letter of the law and the immutable stability of a text as legal foundation law has been slow to take the pragmatic perspective namely the language user s experience and activity in making meaning more accustomed to literal than to pragmatic notions of meaning that is in the text rather than constructed by speakers and hearers the disciplines of law may be culturally resistant to the pragmatic turn by bringing together the different but complementary perspectives of pragmaticians and lawyers this book addresses the issue of to what extent legal meaning can be productively analysed as deriving from resources beyond the text beyond the letter of the law this collection re visits the feasibility of the notion of literal meaning for legal interpretation and at the same time the feasibility of pragmatic meaning for law can explications of pragmatic meaning support court actions in the same way concepts of literal meaning have traditionally supported statutory

interpretations and court judgements what are the consequences of a user based view of language for the law in both its practices of interpretation and its definition of itself as a field readers will find in this collection means of approaching such questions and promising routes for inquiry into the genre and field specific characteristics of inference in law in many respects the problem of literal vs pragmatic meaning confined to the text vs reaching beyond it will appear to parallel the dichotomy in law between textualism and intentionalism there are indeed illuminating connections between the pair of linguistic terms and the more publicly controversial legal ones but the parallel is not exact and the linguistic dichotomy is in any case anterior to the legal one even as linguistic pragmatic investigation may serve legal domains the legal questions themselves point back to central conditions of all linguistic meaning
