coteaching is two or more teachers teaching together sharing responsibility for meeting the learning needs of students and at the same time learning from each other working as collaborators on every aspect of instruction coteachers plan teach and evaluate lessons together over the past decade because coteaching can be highly beneficial to both students and teachers it has become an

increasingly important element of science teacher education and is expanding into other content areas and educational settings this edited book brings together ten years work on the research and the practice of coteaching and its impact on teaching and learning predominantly in the sciences it includes contributions from europe united states and australia and presents an overview of theory and practice common to most studies

mathematics and science education have both grown in fertile directions in different geographic regions yet the mainstream discourse in international handbooks does not lend voice to developments in cognition curriculum teacher development assessment policy and implementation of mathematics and science in many countries paradoxically in spite of advances in information technology and the flat earth syndrome old distinctions and biases between different groups of researchers persist in addition limited accessibility to conferences and journals also contribute to this problem the international sourcebooks in mathematics and science education focus on under represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education the first sourcebook on asian research in mathematics education china korea singapore japan malaysia and india provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the asian and south asian world the book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them the purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in europe north america and other countries in addition to serving as a platform to showcase existing research that has shaped teacher education curricula and policy in these asian countries the book will serve as a standard reference for mathematics education researchers policy makers practitioners and students both in and outside asia and complement the nordic and nctm perspectives
