with gas prices rising always alternative fuels look like an answer hybrids sound good but what about the batteries and fuel cells still seem to be pie in the sky which leaves us with good old diesel this book shows how to get the most out of the diesel engine at a time when its fuel efficiency is almost as important as its massive torque although most diesel truck owners probably aren't planning to break any land speed records advances in diesel technology such as ultra low sulfur fuel high pressure common rail fuel injection electronic fuel management and variable geometry turbocharging are bringing diesel engines into the performance arena and this book is the ideal guide for making your diesel engine perform adapting intake and exhaust torque converters engine electronics turbochargers and much more

obd expert tuner and author keith mccord explains system architecture function and operation he shows you how to use a hand held scanner connect it to the port connector in the car and interpret the data but most importantly he shows you a practical analytical and methodical process for tackling a problem so you can quickly trace its actual source and fix the root cause and not just the symptom from page 4 of cover

shape memory alloy engineering for aerospace structural and biomedical applications second edition embraces new advancements in materials systems and applications introduced since the first edition readers will gain an understanding of the intrinsic properties of smas and their characteristic state diagrams sections address modeling and design process aspects explore recent applications and discuss research activities aimed at making new devices for innovative implementations the book discusses both the potential of these fascinating materials their limitations in everyday life and tactics on how to overcome some limitations in order to achieve proper design of useful sma mechanisms provides a greatly expanded scope looking at new applications of sma devices and current research activities covers all aspects of sma technology from a global state of the art survey to the classification of existing materials basic material design material manufacture and from device engineering design to implementation within actual systems presents the material within a modular architecture over different topics from material conception to practical engineering realization

test techniques for flight control systems of large transport aircraft offers theory and practice of flight control system tests it is a systematic and practical guide providing insights to engineers in flight control particularly those working on system integration and test validation ten chapters cover an introduction to flight control system tests equipment tests and validation software tests and validation flight control law and flying qualities evaluation tests of flight control subsystems integration and validation based on the iron bird ground based test flight tests airworthiness tests and validation and finally the current status and prospects for flight control tests and evaluation presents flight control system integration tests and

validation for large transport aircraft includes the most advanced methods and technologies available details the latest research and its applications offers theoretical and practical guidance that engineers can use considers the state of the art and looks to the future of flight control system tests

this book presents the latest advances and research achievements in the fields of autonomous robots and intelligent systems presented at the ias 15 conference held in baden baden germany in june 2018 it brings together contributions from researchers engineers and practitioners from all over the world on the main trends of robotics navigation path planning robot vision human detection and robot design as well as a wide range of applications this installment of the conference reflects the rise of machine learning and deep learning in the robotics field as employed in a variety of applications and systems all contributions were selected using a rigorous peer review process to ensure their scientific quality the series of biennial ias conferences was started in 1986 since then it has become an essential venue for the robotics community

this proceedings volume gathers outstanding papers submitted to proceedings of china sae congress 2018 selected papers the majority of which are from china the largest car maker as well as most dynamic car market in the world the book covers a wide range of automotive topics presenting the latest technical advances and approaches to help technicians solve the practical problems that most affect their daily work it is intended for researchers engineers and postgraduate students in the fields of automotive engineering and related areas

the objective of the present book which tries to summarize in an edited format and in a fairly comprehensive manner many of the recent technical research accomplishments in the area of smart actuators and smart sensors is to combine researchers and scientists from different fields into a single virtual room the book hence reflects the multicultural nature of the field and will allow the reader to taste and appreciate different points of view different engineering methods and different tools that must be jointly considered when designing and realizing smart actuation and sensing systems
