few episodes in recent history have aroused as much controversy as the united nations military operations in the congo this controversy has no simple straight forward and uniform explanation part of the explanation is to be found in the successes and failure of the operation itself part in its labyrinthine international ramifications but the most important explanation lies in its significance as a precedent the ability of the organization to take collective measures to maintain law and order within the territory of a member state albeit as a means of preserving international peace was demonstrated challenged and criticized so much has been reported of the details and so varied has been the commentary that only the most intrepid spirit would venture something more with which to detain interested parties the present study does not pretend to uncover new data so as to complete or correct the historical record it attempts rather to reflect on what has already been brought out and against that background of factual knowledge to indicate and examine the legal problems involved in so doing it has been necessary to be ruthless in deciding what are central issues and in rejecting what is often interesting but probably peripheral

since 2001 the democratic republic of congo has been engaged in a three fold transition process towards liberalisation democratisation and peace throughout this process external actors donors international financial institutions the un system aid agencies have played a leading role effectively setting the orientations and modalities of this transition including their institutional dimension congolese actors have not been passively subjected to this process however but have potently shaped it in various ways this book investigates the relationship between international aid partners and various congolese actors since 2001 it examines this relationship as an aspect of the state reform process with particular reference to the administration stylianos moshonas argues that the pace and nature of reform has been compromised by the contradictions inherent within the process itself as advocated by international partners and by the ability of congolese power holders to accommodate and co opt such reforms in line with their own political strategies rather than framing aid relations as the outcome of the oppositional points of view of donors and congolese actors this book presents a systematic focus on the compromises and accommodative characteristics that aid politics have coalesced around as well as the contradictory positions donors have found themselves in

head the ill fated military expedition he contemplates why the united states allowed castro to freely export his revolution and why it used cuban exiles to prevent the mineral riches of congo from falling into the hands of international communism villafana shows that cia sponsored miami cuban exiles were instrumental in thwarting castro's plans for congo which were believed to have included a confederacy with tanzania and congo brazzaville to gain control of central africa and its vast resources
