genomic applications are being integrated into a broad range of clinical and research activities at health care systems across the united states this trend can be attributed to a variety of factors including the declining cost of genome sequencing and the potential for improving health outcomes and cutting the costs of care the goals of these genomics based programs may be to identify individuals with clinically actionable variants as a way of preventing disease providing diagnoses for patients with rare diseases and advancing research on genetic contributions to health and disease of particular interest are genomics based screening programs which will in this publication be clinical screening programs

that examine genes or variants in unselected populations in order to identify individuals who are at an increased risk for a particular health concern e.g. diseases, adverse drug outcomes and who might benefit from clinical interventions. On November 1, 2017, the National Academies of Sciences, Engineering, and Medicine hosted a public workshop to explore the challenges and opportunities associated with integrating genomics-based screening programs into health care systems. This workshop was developed as a way to explore the challenges and opportunities associated with integrating genomics-based programs in health care systems in the areas of evidence collection, sustainability, data sharing, infrastructure, and equity of access. This publication summarizes the presentations and discussions from the workshop.

Meeting learning needs with new tools and new thinking: Learning is no longer an activity or luxury that only occurs at specific stages in your life or career. With the digital revolution, learning has become immediate, real time, and relevant whether you're young or old, in the workforce, in school, or at home. As a learning and development professional, you've likely confronted the digital learning revolution armed with instructional design models from the pre-digital world. But today's digital universe has a new model to address its wealth of new technologies and a new philosophy of learning experience design. Learning Cluster Design: Designing for Modern Learning, by Addie and Sam, offers you and your learners a new way to learn. It describes the fundamental shift that has occurred in the nature of L&D's role as a result of the digital revolution and introduces a new five-step model: the Owens Kadakia Learning Cluster Design Model (OK LCD Model), a new five-step model for training design that meets the needs of modern learning. The model's five steps or actions are an easy-to-follow mnemonic: Cluster, Change, on the Job, Behavior, Learn. Learner to Learner Differences, Upgrade Existing Assets, Surround Learning with Meaningful Assets, Track Transformation of Everyone's Results. In each chapter, the authors share stories of business leaders, L&D professionals, and learners who have successfully adopted the OK LCD Model, detailing how they altered organizational mindsets to meet the needs of modern learners and their organizations. Included are how-to features, tools, tips, and real-life in practice sections. This is an exciting

time to be in I d it s time to join the revolution
