this book is perhaps one of the most misunderstood works of catholic theology of our time critics contend that von balthasar espouses universalism the idea that all men will certainly be saved yet as von balthasar insists damnation is a real possibility for anyone indeed he explores the nature of damnation with sobering clarity at the same time he contends that a deep understanding of god's merciful love and human freedom and a careful reading of the catholic tradition point to the possibility not the certainty that in the end all men will accept the salvation christ won for all for this all embracing salvation von balthasar says we may dare hope we must pray and with god's help we must work the catholic church's teaching on hell has been generally neglected by theologians with the notable exception of von balthasar he grounds his reflections clearly in sacred scripture and catholic teaching while the church asserts that certain individuals are in heaven the saints she never declares a specific individual to be in hell in fact the church hopes that in their final moments of life even the greatest sinners would have repented of their terrible sins and be saved sacred scripture states god desires all men to be saved and to come to the knowledge of the truth for there is one god and there is one mediator between god and man the man christ jesus who gave himself as a ransom for all 1 tim 2:4-5

emerging from the fields of ecological restoration and economics this interdisciplinary book delivers a clear path to restoring our economies in a way that speaks well to industry groups and business owners students and the general public and to policy makers there are proven relationships between ecology and economics giordanengo employs those relationships in an intriguing way and integrates them with global case studies to argue that redesigning economic systems according to ecological principles is

necessary to balancing critical social environmental and economic goals for example he reveals how more obscure ecological principles and theories succession evolution diversity productivity curves and so on can inform the restructuring of economic systems that are resilient productive and regenerative a variety of students and practitioners have read the first edition or attended john s seminars only to remark why haven t we learned this in our traditional coursework or this book brings so much clarity to the fields of sustainability and environmental sciences traditional approaches to sustainability focus on the social environmental and economic pillars of an economy while paying little attention to the foundation those pillars rest upon a comprehensive focus on our economy s foundational components has been ignored for good reason we have lacked an understanding of what they are or how they interact with one another cross cutting research between ecological and economic systems reveals three foundational components i e drivers common to both systems the effective management of these components is perhaps the most important obstacle to resolving current tensions between society nature and the global market economy the scale at which diversity energy and trade must be managed is also justified by self regulating ecosystems such as jungles prairies and pine forests that scale is not global nor is it hyper local the economic and ecological rationale agree that the scale of a sustainable economy the natural geography of humans is regional to the contrary the attempt to manage our economy at a global scale has given rise to chronic social environmental and economic symptoms across earth in highly developed countries such as the united states these symptoms include flat real wages and productivity growth a growing wealth gap degraded environmental conditions rising social unrest and more the closing chapters outline a natural path for restoring our economies illuminated by humanities shared experience in ecological restoration the process of ecosystem recovery following disturbance i e succession is one such pathway unwittingly developed nations such as the united states manage succession to concentrate wealth into fewer hands while lowering the economy s productive capacity net productivity and resistance to future disturbances economic policies can also move the succession dial toward the productive and diverse center where wealth and resources are recirculated quickly new business opportunities are created and resilience and resistance are fortified a stout shield in the face of global economic turmoil for policymakers consumers and industry groups this book explores root causes of the challenges you face so that you may take deep correct actions to yield lasting change giordanengo provides critique but goes further with clear steps that individuals businesses communities and policymakers can take to start restoring our economies now from agricultural restoration to regional manufacturing and energy systems he outlines practical strategies and policy mechanisms for building regenerative economies students will find not just theoretical and systems knowledge but applied economics ecology and conservation centered around actionable pathways economic restoration is not only possible it is our humanitarian duty

the first two centuries of the christian era were largely a period of consolidation for the roman empire however the history of the heyday of roman imperium is far from dull for augustus successors ranged from capable administrators tiberius claudius and hadrian to near madmen like caligula and the amateur gladiator commodus who might have wrecked the system but for its inherent strength albino garzetti s classic from tiberius to the antonines first published in 1960 presents a definitive account of this fascinating period which combines a clear and readable narrative with a thorough discussion of the methodological problems and primary sources regarding difficult historical questions it can be relied upon for careful and reasonable judgments based on a full mastery of an immense amount of material nearly three hundred pages of critical notes and a comprehensive bibliography complement the text ensuring its continuing relevance for all students of roman history

a groundbreaking reinterpretation that draws on cognitive theory to show that belief wasn t absent from but rather was at the heart of roman religion belief and cult argues that belief isn t uniquely christian but was central to ancient roman religion drawing on cognitive theory jacob mackey shows that despite having nothing to do with salvation or faith belief underlay every aspect of roman religious practices emotions individual and collective cult action ritual norms social reality and social power in doing so he also offers a thorough argument for the importance of belief to other non christian religions at the individual level the book argues belief played an indispensable role in the genesis of cult action and religious emotion however belief also had a collective dimension the cognitive theory of shared intentionality shows how beliefs may be shared among individuals accounting for the existence of written unwritten or even unspoken ritual norms shared beliefs permitted the choreography of collective cult action and gave cult acts their social meanings the book also elucidates the role of shared belief in creating and maintaining roman social reality shared belief allowed the romans to endow agents actions and artifacts with socio religious status and power in a deep sense no man could count as an augur and no act of animal slaughter as a successful offering to the gods unless romans collectively shared appropriate beliefs about these things closely examining augury prayer the religious enculturation of children and the romans own theories of cognition and cult belief and cult promises to revolutionize the understanding of roman religion by demonstrating that none of its features makes sense without roman belief

this study addresses the centrality of christ in paul s thought recognizing at the same time that he does not express the meaning of christ as an existing teaching christ as a person not a teaching determines paul s thinking for himself and in his reasoning with his readers christ comes to expression in paul as the explication of the fundamental reality for himself and for his readers he develops his thoughts about christ in each case anew as expressions of the lord who determines his life and the lives of his readers in his reasoning with his readers he expects them to become aware of christ as the one who determines them in their new lives as believers

quotations from jewish scriptures play a crucial role in the letter to the romans the rhetorical functions of scriptural quotations in romans explores their rhetorical functions in paul s argumentation it offers a careful text critical analysis of the 51 quotations in romans and asks questions such as does paul quote accurately according to a wording known to him or does he adapt it himself moreover to what extent does paul strive to preserve the sense that the quoted words have in their original context katja kujanpää s approach of combining rhetorical matters with close textual study results in a more comprehensive picture of quotations in romans than has been previously seen thus the book opens new perspectives on paul s argumentation rhetoric and theological agenda
