much like the nervous system the endocrine system relays important communication signals throughout the body the endocrine system uses chemical signals known as hormones which are produced and stored in special glands in the body different glands produce specialized hormones and release them into the bloodstream from there these hormones can travel directly to the tissues and organs and help regulate bodily functions in the endocrine system third edition learn how this chemical messaging system is vital to the body s growth metabolism and sexual development packed with full color photographs and illustrations this absorbing book provides students with sufficient background information through references websites and a bibliography

e book human anatomy

saladin s well accepted organisation of topics is based upon the most logical physiological ties between body systems

in the living signature the body s power to heal and the question of design science and spirit converge in a captivating exploration of the human body as more than mere biology drawing from philosophy theology medicine and biology this book challenges the view that life is the product of blind chance from the cellular dance of regeneration to the breathtaking orchestration of body systems it reveals signs of purpose woven into the fabric of life itself for the scientist the skeptic and the seeker alike this is an invitation to see the body not just as alive but as alive with meaning i will praise thee for i am fearfully and wonderfully made wrote a grateful king david in psalm 139 three thousand years ago he didn t know the half of it in this marvelous book dr octavian caius obeada focuses on the marvelous ability of life to regenerate and heal itself surveying what philosophers and theologians throughout the ages have surmised and detailing the intricate molecular mechanisms that have been discovered by scientists only in recent decades the result is a tour de force showcasing the intelligent design of life michael j behe phd professor of biological sciences at lehigh university in pennsylvania and a senior fellow at discovery institute s center for science and culture and author of darwin s black box the living

signature by dr octavian caius obeada is a profound exploration of the human body s regenerative capacity framed as both a scientific marvel and a philosophical clue to purposeful design drawing on decades of medical experience and insights from biology theology and systems thinking the book challenges reductionist views by asking whether healing is merely mechanical or a message of intention with compelling case studies and a multidisciplinary lens this work invites readers to see the human body not as an accident but as a living signature of meaning and design adrian anthony dormans md faafp from skin and bone to organs and dna the regenerative capabilities of the human body are not only astonishing they hint at something deeper the living signature lays out thoughtful well researched reflections and challenges you to consider whether the complexity and order we see in ourselves could truly be the product of blind chance or the body itself is whispering something about its origin a message not of randomness but of meaning costiuc alexandru m d specialist in gastroenterology regina maria romania resident physician in family medicine university of oradea
