this book builds on existing conversations surrounding millennials and media use by examining generation z's engagement with new media technologies and comparing it to that of millennials. ahmet atay and mary z ashlock have assembled this edited volume in which contributors focus on three interrelated areas: how millennials and gen z use new media technologies and platforms in different contexts; how they use media and what they do with it; and the relationship between the two generations and the media. as media outlets attempt to use millennials and gen z as their targeted audience group, through close analysis and comparison this volume generates a richer discussion about the cultures of millennials and gen z and their complex relationship with media texts and platforms. scholars of media studies, technology studies, communication, and sociology will find this book particularly useful.

the digital world has a wealth of data such as internet of things (iot) data, business data, health data, mobile data, urban data, security data, and many more. in the current age of the fourth industrial revolution (industry 4.0 or 4ir), extracting knowledge or useful insights from these data can be used for smart decision making in various applications. domains in the area of data science, advanced analytics methods including machine learning modeling can provide actionable insights or deeper knowledge about data, which makes the computing process automatic and smart. this book focuses as a reference point on data science and advanced analytics to the researchers and decision makers as well as application developers, particularly from the data-driven solution point of view for real-world problems using social media analytics.

social media and digital technologies are transforming what and how we read books, and social media considers the way in which readers and writers come together in digital communities to discover and create new works of fiction. this new way of engaging with fiction stretches the boundaries of what has been considered a book in the past by moving beyond the physical or even digitally bound object to the consideration of content containers and the ability to share using empirical data and up-to-date research methods.

miriam johnson introduces the ways in which digitally social platforms give rise to a new type of citizen author who chooses to sidestep the industry s gatekeepers and share their works directly with interested readers on social platforms gender and genre especially play a key role in developing the communities in which these authors write the use of surveys interviews and data mining brings to the fore issues of gender genre community and power which highlight the push and pull between these writers and the industry questioning what we always thought we knew about what makes a book and traditional publishing channels this book will be of interest to anyone studying or researching publishing book history print cultures and digital and contemporary literatures
