this book demonstrates how to use access excel word powerpoint and outlook to become more effective and efficient in law enforcement applications the examples presented in this book concentrate on crime analysis and other police functions the exercises solve real world problems in law enforcement using fictional data the book has been designed for a 40 hour seminar or a semester long college course college or university faculty are encouraged to review the book for use in a crime analysis and other law enforcement application courses

by its very nature digital crime may present a number of specific detection and investigative challenges the use of steganography to hide child abuse images for example can pose the kind of technical and legislative problems inconceivable just two decades ago the volatile nature of much digital evidence can also pose problems particularly in terms of the actions of the first officer on the scene there are also concerns over the depth of understanding that generic police investigators may have concerning the possible value or even existence of digitally based evidence furthermore although it is perhaps a cliché to claim that digital crime and cybercrime in particular respects no national boundaries it is certainly the case that a significant proportion of investigations are likely to involve multinational cooperation with all the complexities that follow from this this groundbreaking volume offers a theoretical perspective on the policing of digital crime in the western world using numerous case study examples to illustrate the theoretical material introduced this volume examine the organisational context for policing digital crime as well as crime prevention and detection this work is a must read for all academics police practitioners and investigators working in the field of digital crime

the heart of better policing with microsoft office 2007 is a series of lessons that take you through common tasks performed

every day in police agencies around the world

law enforcement policing security

a comprehensive account of the decades long multiple antitrust actions against microsoft and an assessment of the effectiveness of antitrust law in the digital age for more than two decades the u s department of justice various states the european commission and many private litigants pursued antitrust actions against the tech giant microsoft in investigating and prosecuting microsoft federal and state prosecutors were playing their traditional role of reining in a corporate power intent on eliminating competition seen from another perspective however the government s prosecution of microsoft in which it deployed the century old sherman antitrust act in the volatile and evolving global business environment of the digital era was unprecedented in this book two experts on competition policy offer a comprehensive account of the multiple antitrust actions against microsoft from beginning to end and an assessment of the effectiveness of antitrust law in the twenty first century gaviel and first describe in detail the cases that the department of justice and the states initiated in 1998 accusing microsoft of obstructing browser competition and perpetuating its windows monopoly they cover the private litigation that followed and the european commission cases decided in 2004 and 2009 they also consider broader issues of competition policy in the age of globalization addressing the adequacy of today s antitrust laws their enforcement by multiple parties around the world and the difficulty of obtaining effective remedies all lessons learned from the microsoft cases

this book critically explores how police power manifested beyond criminal law into the field of public health during the pandemic whilst people were engaged with anti police violence protests particularly in the us they were being policed openly and notoriously by the government and medical science in the public health arena the book explores how public health policing might be an abuse of constitutional power and encourages the abolition question to be applied consistently to the state s discourse in the area of public health as black people the world over continue to bear a disproportionate cost burden for public

health policies the chapters explore contemporary policing in terms of the historical context of slavery the growth of the police and prison abolition movement and how this should be applied more widely and how police power operates throughout society beyond the criminal justice system in finance technology housing education and in medicine and health science it seeks to re examine our relationship to health sovereignty and the police power more fundamentally it provides insights into the convergence of policing and social control of humans and argues that the most normative response is abolition

this book demonstrates how to use access excel word and powerpoint to become more effective and efficient in law enforcement applications the examples presented in this book concentrate on crime analysis community policing and investigative data the exercises solve real world problems in law enforcement using fictional data the book has been designed for a 40 hour seminar or a semester long college course college or university faculty are encouraged to review the book for use in a crime analysis and community policing applications courses

featuring chapters authored by leading scholars in the fields of criminology critical race studies history and more the cambridge handbook of race and surveillance cuts across history and geography to provide a detailed examination of how race and surveillance intersect throughout space and time the volume reviews surveillance technology from the days of colonial conquest to the digital era focusing on countries such as the united states canada the uk south africa the philippines india brazil and palestine weaving together narratives on how technology and surveillance have developed over time to reinforce racial discrimination the book delves into the often overlooked origins of racial surveillance from skin branding cranial measurements and fingerprinting to contemporary manifestations in big data commercial surveillance and predictive policing lucid accessible and expertly researched this handbook provides a crucial investigation of issues spanning history and at the forefront of contemporary life

author's previous publication the new russia left off it covers all aspects of politics including the following the highly centralized nature of power in russia central government and presidential elections regional government and developments in the republics including unrest in chechnya and the other caucasian republics and human rights taking a chronological approach it shows how politics overall has changed over the period including how the relationship between prime minister formerly president vladimir putin and president dmitri medvedev has worked out the book continues and adds to the overview of developments in the author's the new russia 2002 and is the companion volume to economic developments in contemporary russia 2011 both published by routledge

this comprehensive textbook by the editor of law and the internet seeks to provide students practitioners and businesses with an up to date and accessible account of the key issues in internet law and policy from a european and uk perspective the internet has advanced in the last 20 years from an esoteric interest to a vital and unavoidable part of modern work rest and play as such an account of how the internet and its users are regulated is vital for everyone concerned with the modern information society this book also addresses the fact that internet regulation is not just a matter of law but increasingly intermixed with technology economics and politics policy developments are closely analysed as an intrinsic part of modern governance law policy and the internet focuses on two key areas e commerce including the role and responsibilities of online intermediaries such as google facebook and uber and privacy data protection and online crime in particular there is detailed up to date coverage of the crucially important general data protection regulation which came into force in may 2018

a fascinating book that takes degrowth in new directions jason hickel author of less is more a must read for anyone who wants to know the brutal truth of digital colonialism driven by the american empire kohei saito author of slow down the world is racing toward an irreversible ecological catastrophe environmental science makes clear that humans must reduce total material resource use requiring a radical redistribution of wealth within and between countries yet little attention has been paid to how the digital economy fits into this equation michael kwet a leading expert on digital colonialism presents a new paradigm for the

digital society merging the science of degrowth with a global analysis of the high tech economy he argues that digital capitalism and colonialism must be abolished quickly in digital degrowth kwet maps out a path to a people s tech future he calls for direct action against silicon valley us imperialism and power elites everywhere in order to realize a radically egalitarian digital society that fosters equality in harmony with nature

written in the manner of a good crime thriller the wall street journal the inside story of the largest law enforcement sting operation ever in which the fbi created its own tech start up to wiretap the world in 2018 a powerful app for secure communications called anom took root among organized criminals they believed anom allowed them to conduct business in the shadows except for one thing it was secretly run by the fbi backdoor access to anom and a series of related investigations granted american australian and european authorities a front row seat to the underworld tens of thousands of criminals worldwide appeared in full view of the same agents they were trying to evade international smugglers money launderers hitmen a sprawling global economy as efficient and interconnected as the legal one officers watched drug shipments and murder plots unfold making arrests without blowing their cover but as the fbi started to lose control of anom did the agency go too far a painstakingly investigated exposé dark wire reveals the true scale and stakes of this unprecedented operation through the agents and crooks who were there this fly on the wall thriller is a caper for our modern world where no one can be sure who is listening in

this book is an overview of the united states legal system with a brief introduction to islamic and international law the book is divided into six parts part i the legal system and crime introduces the u s legal system and the classification of crime part ii white collar crime covers cybercrime crime the old fashioned way and healthcare fraud part iii homicide deals with simple murder serial murder mass and spree murder and assassination part iv special groups covers the mafia the family the medical legal and teaching professions the religion profession celebrities and stupid criminals part v on the edge deals with topics i consider to be a bit strange that is quackery innovative defenses and dangerous cults and finally part vi residue discusses what

is left capital punishment and crimes against humanity including terrorism throughout the book to illustrate points i have used over 300 cases of actual crimes the names of the people and the facts of the cases used in the discussions of these crimes are taken directly from referenced news reports the subtitle computer viruses to twin towers reflects the scope of the book that is from computer viruses which cause only aggravation or loss of money to the deadly terrorist attacks on the twin towers of the world trade center and the pentagon on september 11 2001 that snuffed out almost 3000 lives

the use of extra territorial intelligence is growing among security border and public agencies internationally rapidly evolving efforts to tackle transnational crime entail the exchange of intelligence across jurisdictions and state borders as well as the linking of law enforcement operations this book provides a number of different perspectives from across europe australasia and canada to examine recent cooperation experiences and the challenges faced in practice the book brings together scholars from a range of legal and criminological fields to examine the legal imperatives and social parameters that shape international police and justice cooperation and highlights the importance of both trust and clear legal rules to ensure effective cooperation it focuses on areas where cooperation is now mandated but where significant issues are raised including the international and regional methods of information and intelligence exchange and challenges to human rights protection the coordination of international and regional exchange of evidence such as forensic bioinformation police cooperation in international investigations and the added value of formalising investigative strategies across jurisdictions regionally and internationally and the operation accountability and legitimacy of organisations and institutions of cooperation in law enforcement and specific international policing missions

this interdisciplinary volume critically explores how the ever increasing use of automated systems is changing policing criminal justice systems and military operations at the national and international level the book examines the ways in which automated systems are beneficial to society while addressing the risks they represent for human rights this book starts with a historical overview of how different types of knowledge have transformed crime control and the security domain comparing those

epistemological shifts with the current shift caused by knowledge produced with high tech information technology tools such as big data analytics machine learning and artificial intelligence the first part explores the use of automated systems such as predictive policing and platform policing in law enforcement the second part analyzes the use of automated systems such as algorithms used in sentencing and parole decisions in courts of law the third part examines the use and misuse of automated systems for surveillance and social control the fourth part discusses the use of lethal semi autonomous weapons systems in armed conflicts an essential read for researchers politicians and advocates interested in the use and potential misuse of automated systems in crime control this diverse volume draws expertise from such fields as criminology law sociology philosophy and anthropology
