the understanding of global environmental management problems is best achieved through transdisciplinary research lenses that combine scientific and other sector industry government etc tools and perspectives however developing effective research teams that cross such boundaries is difficult this book demonstrates the importance of transdisciplinarity describes challenges to such teamwork and provides solutions for overcoming these challenges it includes case studies of transdisciplinary teamwork showing how these solutions have helped groups to develop better understandings of environmental problems and potential responses

the latest development concerning the metaphorical use of the fairy tale is the legal perspective the law had and has recourse to fairy tales in order to speak of the nomos and its subversion of the politically correct and of the various means that have been used to enforce the law fairy tales are a fundamental tool to examine legal procedures and structures in their many failings and errors therefore we have privileged the term fables of the law just to stress the ethical perspective they are moral parables that often speak of justice miscarried and justice sought law and jurists are creators of fables on the view that law is born out of the facts ex facto ius oritur so that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found this is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
