this book knowledge of predictive techniques of nadi astrology is a powerful tool for gaining profound knowledge about the event prediction of a person born with a unique set of psychological tendencies and life potentials the horoscope shows us what we are presently working with based on our past actions and thoughts besides providing deep insight into the past and present in the realm of vedic astrology much has been said about planetary influences dasha systems house significations and nakshatra based interpretations but there lays a hidden terrain often overlooked yet profoundly potent the idea that every planet casts not only its influence but also a psychological reflection upon the native these reflections are not mere metaphors they are real impressions on the mind often functioning as shadows archetypes or inner voices that shape how an individual perceives reality makes choices and lives out their karma in this article we shall dive into this esoteric junction between jyotish and psychology especially focusing on what can be called the pratibimb gyaan knowledge of planetary reflections this approach fuses traditional astrological principles with a psychological lens drawing upon deeper truths embedded in ancient texts and supported by experiential insights understanding the concept of planetary reflections what do we mean by planetary reflections each graha planet is not just a karaka significator of certain events but also a bearer of certain psychological tendencies these tendencies when unacknowledged can operate from the unconscious manifesting as compulsions projections fears or irrational desires in simpler terms we carry within us the inner mars the inner moon the inner rahu and so on these inner grahas behave like psychological sub personalities often conflicting with one another or aligning based on planetary relationships in the natal chart for instance when a person has a strong mars aspecting moon there is a potential for inner aggression or restlessness to dominate emotional peace but this doesn't just play out externally it creates an inner battlefield the moon symbolizing the emotional mind manas reflects the agitation of mars like water disturbed by fire these reflections become psychological patterns mars reflects as the warrior the drive the impulse to dominate or fight saturn reflects as fear control restriction and also deep rooted endurance

the diseases are the result of our past karmas and indicated by weak and afflicted planets this can be easily understood by an astrologer therefore every book on astrology has discussed the diseases and yogas for these diseases are scattered throughout the astrological literature some of these yogas have been compiled in this book for the intelligent readers with the observations and experiences of author author has used the astrology for the purpose of diagnosis as other laboratory tests mri and cat scan etc it gave good results to understand whether the chronic diseases are curable or not moreover it has helped to understand the time period of onset of the disease which no other science can explain therefore astrology is science of sciences one must be careful while predicting diseases because so many factors are involved in prediction only the yoga for disease is not sufficient if the yoga is aspected by benefic planets the results will be nullification of malefic influence the disease depends on the strength of the disease producing planets even if a disease may be indicated from a house from lagna but from moon and navamsha lagna the same house is strong and lord is fortified the malefic influence may get cancelled therefore while judging one must consider the house lord of house and karaka of the house rashish where the lord of house is posited i e dispositor and navamshesh the lord of house in navamsha chart where the lord of the house is posited and relationship in navamsha chart between lagna lord and lord of the house into consideration from lagna moon navamsha lagna and nakshatra of the planet in which he is posited one must take into consideration the nature and qualities of the planets causing the disease functional benefic or malefic to the lagna house in which they are posited the benefic planet will certainly cause less harm than the malefic planet the relationship between the two planets also affects the disease producing capacity the relationship is also natural and functional the aspect and conjunction of the planets should also be taken into consideration the retrograde malefic planet is more powerful in causing diseases than the normal malefic planet the retrograde benefic planet does not protect the native when a benefic planet is lord of maraka house and posited in that house it becomes strong maraka planet keeping the above factors into consideration we can predict the timing of onset of diseases with the help of dasha system and gochar the most common dasha system employed is vimshottari dasha system still we can divided the timing of diseases into 1 yogas present in the horoscope 2 dasha bhukti paratyantar dasha 3 transit gochar 4 horary all these

factors have been discussed in this book in detail
