the traditional role of a bank was to transfer funds from savers to investors engaging in maturity transformation screening for borrower risk and monitoring for borrower effort in doing so a typical loan contract was set up along six simple dimensions the amount the interest rate the expected credit risk determining both the probability of default for the loan and the expected loss given default the required collateral the currency and the lending technology however the modern banking industry today has a broad scope offering a range of sophisticated financial products a wider geography including exposure to countries with various currencies regulation and monetary policy regimes and an increased reliance on financial innovation and technology these new bank business models have had repercussions on the loan contract in particular the main components and risks of a loan contract can now be hedged on the market by means of interest rate swaps foreign exchange transactions credit default swaps and securitization securitized loans can often be pledged as collateral thus facilitating new lending and the lending technology is evolving from one to one meetings between a loan officer and a borrower at a bank branch towards potentially disruptive technologies such as peer to peer lending crowd funding or digital wallet services this book studies the interaction between traditional and modern banking and the economic benefits and costs of this new financial ecosystem by relying on recent empirical research in banking and finance and exploring the effects of increased financial

sophistication on a particular dimension of the loan contract
