this science and technology committee report on practical experiments in school science lessons and science field trips concludes that many students are receiving poor practical science experiences during their secondary school education there was no credible evidence to support the frequently cited explanation of health and safety concerns for a decline in practicals and trips instead more focus is needed on what happens after teachers have been recruited to the profession knowledge and practical skills must be maintained and developed in order for high quality science education to be delivered high quality science facilities and qualified and experienced technical support are vital a career structure for technical staff should be provided and the government should ensure schools provide science facilities to match its aspirations for science education practical science is relatively expensive and carries little cachet for parents comparing schools the inspection regime and the requirements set for exam boards should therefore drive higher quality with more and better practical science lessons the committee also found a lack of coherence in the provision of science educational materials it urges the science community to utilise the stem directories the online database of stem enhancement and enrichment activities for schools and colleges and calls on the government to secure the future of the directories which provide vital contacts between schools and scientists finally the committee urges the government to provide a detailed strategy on how it intends to achieve its ambition to increase participation in school science subjects

a man s sexual nature like all else that is most essential in him is rooted in a soil that was formed very long before his birth in this as in every other respect he draws the elements of his life from his ancestors however new the recombination may be and however greatly it may be modified by subsequent conditions a man s destiny stands not in the future but in the past that rightly considered is the most vital of all vital facts every child thus has a right to choose his own ancestors naturally he can only do this

vicariously through his parents it is the most serious and sacred duty of the future father to choose one half of the ancestral and hereditary character of his future child it is the most serious and sacred duty of the future mother to make a similar choice 1 in choosing each other they have between them chosen the whole ancestry of their child they have determined the stars that will rule his fate in the past that fateful determination has usually been made helplessly ignorantly almost unconsciously it has either been guided by an instinct which on the whole has worked out fairly well or controlled by economic interests of the results of which so much cannot be said or left to the risks of lower than bestial chances which can produce nothing but evil in the future we cannot but have faith for all the hope of humanity must rest on that faith that a new guiding impulse reinforcing natural instinct and becoming in time an inseparable accompaniment of it will lead civilized man on his racial course just as in the past the race has on the whole been moulded by a natural and in part sexual selection that was unconscious of itself and ignorant of the ends it made towards so in the future the race will be moulded by deliberate selection the creative energy of nature becoming self conscious in the civilized brain of man this is not a faith which has its source in a vague hope the problems of the individual life are linked on to the fate of the racial life and again and again we shall find as we ponder the individual questions we are here concerned with that at all points they ultimately converge towards this same racial end since we have here therefore to follow out the sexual relationships of the individual as they bear on society it will be convenient at this point to put aside the questions of ancestry and to accept the individual as with hereditary constitution already determined he lies in his mother s womb
