nationalism the state of mind in which the individual's supreme loyalty is owed to the nation state remains the strongest of political emotions as a historical phenomenon it is always in flux changing according to no preconceived pattern in the new nationalism louis snyder sees various forms of nationalism and categorizes them as a force for unity a force for the status quo a force for independence a force for fraternity a force for colonial expansion a force for aggression a force for economic expansion and a force for anti colonialism in snyder's opinion nationalism should be differentiated from theodore roosevelt's new nationalism a phrase he borrowed from herbert d croly's the promise of american life croly warned that giving too much power to big industry and finance would lead to the degradation of the masses and that state and federal intervention must be pursued on all economic fronts roosevelt expanded upon this concept and saw the flourishing of democratic government as a means of reviving the old pioneer sense of individualism and opportunity snyder in contrast extends the work of the two major pioneers in the study of modern nationalism carlton j h hayes and hans kohn in exploring this most powerful sentiment of modern times and showing how it relates to the political economic and psychological tendencies of historical development

in modernism nationalism and the novel first published in 2000 pericles lewis shows how political debates over the sources and nature of national character prompted radical experiments in narrative form amongst modernist writers though critics have accused the modern novel of shunning the external world lewis suggests that far from abandoning nineteenth century realists concern with politics the modernists used this emphasis on individual consciousness to address the distinctively political ways in which the modern nation state shapes the psyche of its subjects tracing this theme through joyce proust and conrad amongst others lewis claims that modern novelists gave life to a whole generation of narrators who forged new social realities in their own images their literary techniques multiple narrators transcriptions of consciousness involuntary memory and arcane symbolism focused attention on the shaping of the individual by the nation and on the potential of the individual in time of crisis to redeem the nation

even in the face of neoliberal globalization nationalism remains a significant political force the leading contributors to this new volume explore the extent to which nationalism can be a foundation for alternative solidarities against the axiom that with globalization all that is solid melts into air this anthology debates the extent to which different forms of solidarity remain viable from the solidarities of local political groups to the solidarities of nationalism internationalism and alternative globalisms organized into three sections the book addresses the relationship between the contemporary formations of nationalism globalism and solidarity movements part 1 offers a framework for understanding globalization and discusses the effect of globality on nationalism part 2 addresses the logics of nationalisms in globalizing contexts respectively liberal nationalism left nationalism post colonial nationalism and revivals of nationalism part 3 addresses issues of solidarity and integration in a world of nationalism and globalism asking how differing forms of connectivity may be emerging disrupting prevailing oppositions and relations focusing on social movements and solidarity offering the first detailed study of the relationship between globalization and nationalism nationalism and global solidarities will be of strong interest to students and scholars of politics sociology and international political economy

the first major study in over three decades to explore the essential arguments of all the major theoretical interpretations of nationalism from the modernist approaches of gellner nairn breuilly giddens and hobsbawm to the alternative paradigms of van den bergh and geertz armstrong and smith himself in a style accessible to the student and the general reader smith traces the changing view of this hotly discussed topic within the current political cultural and socioeconomic arena he also analyses the contributions of such historians sociologists and political scientists as seton watson reynolds hastings horowitz and brass the survey concludes with an analysis of post modern approaches to national identity gender and nation making it indispensable reading to all those interested in gaining full and authoritative knowledge of nationalism

the movement of nation building in islamic societies away from the secular or pan arab models of the early twentieth century toward a variety of nationalisms was accompanied by growing antagonism between the muslim majority and ethnic or religious minorities the papers in nationalism and minority identities in islamic societies offer a comparative analysis of how these minorities developed their own distinctive identities within the modern islamic nation state the essays focus on identity formation in five minority groups copts in egypt baha is and christians in pakistan berbers in algeria and morocco and kurds in turkey and iraq while every minority community is distinctive the experiences of each show that a state s authoritarian rule uncompromising attitude towards expressions of particularism and failure to offer tools for inclusion are all responsible for the politicization and radicalization of

minority identities the place of islam in this process is complex while its initial pluralistic role was transformed through the creation of the modern nation state the radicalization of society in turn radicalized and politicized minority identities minority groups though at times possessing a measure of political autonomy remain intensely vulnerable contributors include juan r i cole university of michigan david l crawford fairfield university michael gunter tennessee technological university azzedine layachi st john s university richard c martin emory university paul s rowe university of western ontario maya shatzmiller university of western ontario charles d smith university of arizona pieternella van doorn harder valparaiso university the late linda s walbridge university of oklahoma and m hakan yavuz university of utah announcing the series studies in nationalism and ethnic conflict general editors sid noel and richard vernon co directors of university of western ontario s nationalism and ethnic conflict research group studies in nationalism and ethnic conflict is a series that examines the political dimensions of nationality in the contemporary world the series includes both scholarly monographs and edited volumes which consider the varied sources and political expressions of national identities the politics of multiple loyalty the domestic and international effects of competing identities within a single state and the causes of and political responses to conflict between ethnic and religious groups the volumes are designed for use by university students scholars and interested general readers

since its publication this important study has become established as a central work on the vast and contested subject of modern nationalism placing historical evidence within a general theoretical framework john breuilly argues that nationalism should be understood as a form of politics that arises in opposition to the modern state in this updated and revised edition he extends his analysis to the most recent developments in central europe and the former soviet union he also addresses the current debates over the meaning of nationalism and their implications for his position breuilly challenges the conventional view that nationalism emerges from a sense of cultural identity rather he shows how elites social groups and foreign governments use nationalist appeals to mobilize popular support against the state nationalism then is a means of creating a sense of identity this provocative argument is supported with a wide ranging analysis of pertinent examples national opposition in early modern europe the unification movement in germany italy and poland separatism under the hapsburg and ottoman empires fascism in germany italy and romania post war anti colonialism and the nationalist resurgence following the breakdown of soviet power still the most comprehensive and systematic historical comparison of nationalist politics nationalism and the state is an indispensable book for anyone seeking to understand modern politics

globalization and european integration are sometimes seen as the enemies of nationalism sweeping away particularisms and imposing a single economic cultural and political order the book argues on the contrary that by challenging the nation state as the sole basis for identity and sovereignty they open the way for a variety of claims by stateless nations it is certainly true that recent years have seen a strong recurrence of nationalist claims in europe and in other parts of the world at the same time however globalization and european integration provide new ways of managing nationality claims at one level they lower the stakes in independence and might permit peaceful transitions to independence yet they may also

make independence in the traditional sense less important and provide ways in which multiple and conflicting nationality claims could be accommodated in new political structures the chapters in this collection consider these issues from a theoretical perspective and through case studies of stateless nationalisms in western eastern and central europe the former soviet union and quebec they record a wide variety of experiences and show that while there are no easy answers to conflicting national claims there is reason to believe that they can be managed through democratic political processes

this book addresses a seemingly paradoxical situation on the one hand nationalism from scotland to the ukraine remains a resilient political dynamic fostering secessionist movements below the level of the state on the other the competence and capacity of states and indeed the coherence of nationalism as an ideology are increasingly challenged by patterns of globalisation in commerce cultural communication and constitutional authority beyond the state it is the aim of this book to shed light on the relationship between these two processes addressing why the political currency of nationalism remains strong even when the salience of its objective independent and autonomous statehood becomes ever more attenuated the book takes an interdisciplinary approach both within law and beyond with contributions from international law constitutional law constitutional theory history political science and sociology the challenge for our time is considerable global networks grow ever more sophisticated while territorial borders such as those in eastern and central europe become seemingly more unstable it is hoped that this book by bringing together areas of scholarship which have not communicated with one another as much as they might will help develop an ongoing dialogue across disciplines with which better to understand these challenging and potentially destabilising developments
