increases in the number and improvements in the quality of arms transferred to sub saharan african nations clearly will affect those nations economic development and political stability both immediately and in the long term problems of technology absorption manpower development and the diversion of financial and human resources occasioned by such transfers become more and more critical as the demand for military modernization by african governments grows and the industrial nations compete to meet the demand dr arlinghaus evaluates conflicting assessments of the costs and benefits of military development from the perspective that it would be best for african nations to allocate resources for defense on the basis of socioeconomic considerations as well as their military and political goals

in war do mass and materiel matter most will states with the largest best equipped information technology rich militaries invariably win the prevailing answer today among both scholars and policymakers is yes but this is to overlook force employment or the doctrine and tactics by which materiel is actually used in a landmark reconception of battle and war this book provides a systematic account of how force employment interacts with materiel to produce real combat outcomes stephen biddle argues that force employment is central to modern war becoming increasingly important since 1900 as the key to surviving ever more lethal weaponry technological change produces opposite effects depending on how forces are employed to focus only on materiel is thus to risk major error with serious consequences for both policy and scholarship in clear fluent prose biddle provides a systematic account of force employment s role and shows how this account holds up under rigorous multimethod testing the results challenge a wide variety of standard views from current expectations for a revolution in military affairs to mainstream scholarship in international relations and orthodox interpretations of modern military history military power will have a resounding impact on both scholarship in the field and on policy debates over the future of warfare the size of the military and the makeup of the defense budget

reflections on war is a comprehensive and objective investigation into the problems of war the book explores the crucial link between theory strategy and objectives in war taking all the evidence and theory into account and should be of interest to military practitioners specialists in defence studies and others interested in military history also notable about the work is its ability to draw insights together from international legal theory management sciences history sociology and the political economy of war showing due respect for the moral complexities involved in waging war

this volume examines the causes and consequences of stress in the military focussing on how stress and well being shape the experiences of military

personnel both in and out of the combat zone

ongoing operations and emerging mission requirements place a heavy burden on army resources resulting in capability gaps that the army is unable to fill by itself one solution is to build the appropriate capabilities in allies and partner armies through focused security cooperation to do this army planners need a more comprehensive understanding of the capability gaps and a process for matching those gaps with candidate partner armies
