this book aims to make a theoretical empirical and prescriptive contribution to the contemporary study of policy transfer in the first regard it observes that despite bold claims to the contrary see dolowitz and marsh 1996 and evans ed 2010 most studies of policy transfer are characterised by their mono cultural understanding of the process of policy oriented learning reflected in an obsession with the destination of transfer rather than its original policy setting or settings this betrays an absence of strong comparative investigation of the process of learning moreover existing approaches to the study of policy transfer networks the process of policy learning are limited by their narrow epistemological perspectives as in the

main they tend to lend undue focus on actors ideas interests or structure following the work of marsh and smith on policy networks 2000 this book contends that these elements cannot be separately analyzed it therefore advances an interactive model of policy transfer networks that investigates the process of learning through three interactive dimensions between structure and agents network and context and network and outcome the book s second main contribution the presentation of original case study explorations of the role of policy transfer in facilitating the rise of the quasi competition state the book contends that policy transfer has become a key policy instrument in the process of transition from a command to a market socialist economy and latterly to what may be termed a quasi competition state indeed in order to meet the perceived imperatives of state transformation the reform and open door policy has been featured by a broad range of processes of policy learning it is however beyond the scope of this book to present a comprehensive description and explanation of this complex and multi faceted reform process rather the aim of this account is to provide an examination of certain processes of policy transfer which are broadly indicative of the dynamics of change underpinning the incremental process of reform the third and final contribution of this book lies in its identification of the ingredients of rational policy transfer which can hopefully help guide future chinese policy makers to more progressive policy outcomes
