there is a considerable amount of interesting and somewhat recondite not to say uncanny information contained in the initial number of the twenty fourth volume of the columbia university studies in history economics and public law the place of magic in the intellectual history of europe is a theme which in the hands of a william draper henry lea or an andrew white would yield unfathomed depths of storied wickedness ignorance and superstition all flowing out of the catholic church in the hands of mr thorndike however it unfolds no such legend the term magic lends itself to no process of rigid defining and so the author allows it to cover beliefs in auguries omens divinations sorcery necromancy astrology alchemy and other such occult agencies which our wiser age has found to be on the whole highly superstitious and absurd that such beliefs have existed semper et ubique everybody knows the ecclesiastical review vol 34

in this personal journey through a unique performing art david copperfield profiles some of the world s most groundbreaking magicians from the sixteenth century magistrate who wrote an early book on conjuring to the roaring twenties and the man who fooled houdini to the woman who levitated vanished and caught bullets in her bare hands david copperfield s history of magic takes you on a wild journey through the remarkable feats of some of the greatest magicians in history the result is a sweeping tale that reveals how these astonishing performers were outsiders who used magic to escape class challenge conventions transform popular culture explore the innermost workings of the human mind and inspire scientific discovery their incredible stories are complemented by more than 100 never before seen photographs of

artifacts from copperfield's exclusive museum of magic including a sixteenth century manual on sleight of hand houdini's straitjackets handcuffs and water torture chamber dante's famous sawing in half apparatus alexander's high tech turban that allowed him to read people's minds and even some coins that may have magically passed through the hands of abraham lincoln by the end of the book you'll be sure to share copperfield's passion for the power of magic

deities demons and angels became important protagonists in the magic of the late antique world and were also the main reasons for the condemnation of magic in the christian era supplicatory incantations rituals of coercion enticing suffumigations magical prayers and mystical songs drew spiritual powers to the human domain next to the magician's desire to regulate fate and fortune it was the communion with the spirit world that gave magic the potential to purify and even deify its practitioners the sense of elation and the awareness of a metaphysical order caused magic to merge with philosophy notably neoplatonism the heritage of late antique theurgy would be passed on to the arab world and together with classical science and learning would take root again in the latin west in the high middle ages the metamorphosis of magic laid out in this book is the transformation of ritual into occult philosophy against the background of cultural changes in judaism graeco-roman religion and christianity this volume the first in the new series groningen studies in cultural change offers the papers presented at the workshop the metamorphosis of magic from late antiquity to the early modern period held from 22 to 24 june 2000 and organised by jan n bremmer and jan r veenstra the papers have been written by scholars from such varying disciplines as classics theology philosophy cultural history and law their contributions shed new light upon several old obscurities they show magic to be a significant area of culture and they advance the case for viewing transformations in the lore and practice of magic as a barometer with which to measure cultural change

a new history which overturns the received wisdom that science displaced magic in enlightenment britain in early modern britain belief in prophecies omens ghosts apparitions and fairies was commonplace among both educated and ordinary people the absolute existence of a spiritual world was taken for granted yet in the eighteenth century such certainties were swept away credit for this great change is usually given to science and in particular to the scientists of the royal society but is this justified michael hunter argues that those pioneering the change in attitude were not scientists but freethinkers while some scientists defended the reality of supernatural phenomena these sceptical humanists drew on ancient authors to mount a critique both of orthodox religion and by extension of magic and other forms of superstition even if the religious heterodoxy of such men tarnished their reputation and postponed the general acceptance of anti-magical views slowly change did come about when it did this owed less to the testing of magic than to the growth of confidence in a stable world in which magic no longer had a place
