the european union has highlighted the issue of environmentally sound use of products in the context of integrated product policy ipp accordingly consumers should have easy access to understandable relevant and credible environmental information information about product characteristics is available in different forms and sources but in many cases relevant environmental information is not available on the product itself the study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information user manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products other studied products included such

durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products the study raised many ideas about actions that could promote the status and eco development of instructions for use

the toyota production system tps is regarded as a sophisticated concept that helps us understand the world of manufacturing it evolved from the system of mass producing cars established by ford and the japanese have since endeavored to make their own universal production system though much has been accomplished tps progress is a continuous process the theme of this book is how to understand and learn tps there is a tps concept that seems to elude many and that is that manufacturers should be able to make a product available at the moment a customer comes and asks for it there are various ways and various tools that can be used to pursue the ideal state and therefore we need to focus on the basic principles of tps this book tries to explain those toyota production system concepts that may otherwise be elusive this book focuses on the factory to help readers understand the fundamental ideology of tps the main character started his career as a technical expert in the r d division of an automotive company and eventually becomes an instructor of tps his broad career in companies is used to vividly describe the form of the toyota production system to explain the growth of apprentices of various titles and positions this story is woven with several short stories presented from the perspective of the main character who grows from being a group leader to section leader to manager to general manager essentially this book describes the toyota production system as based on the philosophy always sketching out and pursuing the ideal state of manufacturing

electronic instrument panel displays systems covers the many technical considerations of instrument panel display systems including brightness contrast temperature sensitivity space requirements color capabilities and human factors concepts as part of the progress in technology electronics series this book contains 40 technical papers written in the last eleven years on the progress of instrument panel displays and their corresponding electronic systems papers are grouped according to display technology and present the most recent advances in that area plus several of historical interest electronic instrument panel display systems is divided into ten sections vacuum fluorescent displays fluorescent indicator panels liquid crystal displays electroluminescent displays light emitting diode displays electroluminescent displays light emitting diode displays cathode ray tube displays head up displays virtual and holographic displays reconfigurable displays and human factors considerations

since the introduction of automated vehicles avs on roads there have been a number of high profile collisions which have highlighted significant driver challenges these include challenges associated with drivers trust in the automation their knowledge and awareness of the av s capabilities and limitations and their reduced situation awareness of the road environment and the vehicle solutions are needed to overcome these challenges so that the expected benefits of avs can be realised driver training for automated vehicles a systems approach identifies the training requirements for drivers of avs and takes a systematic approach to design develop implement and evaluate a comprehensive training package to address these requirements this book explores how training can

overcome the driver challenges associated with avs by improving drivers mental models trust in automation decisions and behaviour when activating a level 4 av it presents a systematic approach to the training lifecycle by first presenting the current state of research into avs identifying the challenges and training requirements for drivers of avs and then developing and evaluating a training programme to achieve these requirements this fascinating title highlights the need for drivers to undergo training for avs and takes us a step closer to this need it walks readers through a systematic four step process and provides practical guidance to develop and evaluate an effective training programme the reader will develop a thorough understanding of the current driver challenges with avs and the methods and systems to mitigate them through current knowledge and research this book is an ideal read for practitioners designers and academics with a professional or research interest in avs its appeal extends to those in the fields of automotive design systems engineering human factors and education and training

topological modelling of nanostructures and extended systems completes and expands upon the previously published title within this series the mathematics and topology of fullerenes vol 4 2011 by gathering the latest research and advances in materials science at nanoscale it introduces a new speculative area and novel concepts like topochemical reactions and colored reactive topological indices and provides a better understanding of the physical chemical behaviors of extended systems moreover a charming new family of space filling fullerene crystals is here analyzed for the first time particular attention is given to the fundamental influences exercised by long range connectivity topological mechanisms on the chemical and physical properties of carbon nanostructures systems consisting in graphenic layers with structural and topological defects are investigated in their electronic and magnetic behaviors also in presence of metallic particles more specifically the book focuses on electronic properties of low dimensional nanostructures including negatively curved carbon surfaces pariser parr pople model hamiltonian approach to graphene studies topochemistry and toporeactivity of extended sp² nanocarbons pah fullerenes nanoribbons moebius like nanoribbons nanotubes and grapheme novel class of crystal networks arising from spanning fullerenes nanostructures and eigenvectors of matrices and an extended treatise of topological invariants enumeration hetero fullerenes by polya theory topological modelling of nanostructures and extended systems represents a valuable resource to advances graduates and researchers working in mathematics chemistry physics and material science

a complete up to date introductory guide to fuel cell technology and application fuel cell fundamentals provides a thorough introduction to the principles and practicalities behind fuel cell technology beginning with the underlying concepts the discussion explores fuel cell thermodynamics kinetics transport and

modeling before moving into the application side with guidance on system types and design performance costs and environmental impact this new third edition has been updated with the latest technological advances and relevant calculations and enhanced chapters on advanced fuel cell design and electrochemical and hydrogen energy systems worked problems illustrations and application examples throughout lend a real world perspective and end of chapter review questions and mathematical problems reinforce the material learned fuel cells produce more electricity than batteries or combustion engines with far fewer emissions this book is the essential introduction to the technology that makes this possible and the physical processes behind this cost saving and environmentally friendly energy source understand the basic principles of fuel cell physics compare the applications performance and costs of different systems master the calculations associated with the latest fuel cell technology learn the considerations involved in system selection and design as more and more nations turn to fuel cell commercialization amidst advancing technology and dropping deployment costs global stationary fuel cell revenue is expected to grow from 1 4 billion to 40 0 billion by 2022 the sector is forecasted to explode and there will be a tremendous demand for high level qualified workers with advanced skills and knowledge of fuel cell technology fuel cell fundamentals is the essential first step toward joining the new energy revolution
