everyone has been wounded some wounds recall childhood hurts some are more recent they may be personal through family or close friends or they can be generated by workplace issues with a boss or coworker no matter where they originate woundedness is a human malady stemming from our brokenness and it makes us question the very purpose of the hurts we experience come along with the author as she takes us into one man's journey of being wounded and how his story affects ours joseph was a man just like us who experienced the depth of painful circumstances and went on to a height he never dreamed as we study his life we learn that god was after his heart just as he is after ours and mine where there is adversity there is fear but god desires to transform our fear into faith he pursues us in the depths of pain in order to bring us to his glory even though our hearts have been wounded by people we have a god who heals our wounds and through the process of fellowship with him shows us his heart

christopher alexander's series of ground breaking books including a pattern language and the timeless way of building have pointed to fundamental truths of the way we build revealing what gives life and beauty and true functionality to our buildings and towns now in the nature of order alexander explores the properties of life itself highlighting a set of well defined structures present in all order and in all life from micro organisms and mountain ranges to good houses and vibrant communities in the phenomenon of life the first volume in this four volume masterwork alexander proposes a scientific view of the world in which all space matter has perceptible degrees of life and sets this understanding of order as an intellectual basis for a new architecture with this view as a foundation we can ask precise questions about what must be done to create more life in our world whether in a room a humble doorknob a neighbourhood or even in a vast region he introduces the concept of living structure basing it upon his theories of centers and of wholeness

and defines the fifteen properties from which according to his observations all wholeness is built alexander argues that living structure is at once both personal and structural taken as a whole the four books create a sweeping new conception of the nature of things which is both objective and structural hence part of science and also personal in that it shows how and why things have the power to touch the human heart a step has been taken through which these two domains the domain of geometrical structure and the feeling it creates kept separate during four centuries of scientific thought from 1600 to 2000 have finally been united
