in this study we contribute to such efforts to enhance the use of tractors in africa by describing the key characteristics of markets for tractors in nigeria nigeria is among a set of countries in africa that has both low agricultural productivity and low agricultural mechanization growth malabo montpellier

panel 2018 current understanding of the tractor market in nigeria mainly highlights only specific aspects of mechanization issues or only delves into the application of specific emergent mechanization technologies consequently many stakeholders do not have sufficient understanding of how tractor markets in nigeria are organized both in vertical and in geographic terms

it is becoming increasingly important to examine the relationship between the outcomes of a clinical trial and the costs of the medical therapy under study the results of such analysis can affect reimbursement decisions for new medical technologies drugs devices or diagnostics it can aid companies seeking to make claims about the cost effectiveness of their product as well as allowing early consideration of the economic value of therapies which may be important to improving initial adoption decisions it is also vital for addressing the requirements of regulatory bodies economic evaluation in clinical trials provides practical advice on how to conduct cost effectiveness analyses in controlled trials of medical therapies this new edition has been extensively rewritten and revised topics discussed range from design issues such as the types of services that should be measured and price weights to assessment of quality adjusted life years illustrative materials case histories and worked examples are included to encourage the reader to apply the methods discussed these exercises are supported with datasets programmes and solutions made available online

chikungunya fever is a vector borne disease transmitted by mosquitoes that became widely prevalent in most of the coastal states of indian union since 2006 it causes numerous health problems to the victims and cognitive problems for medical practitioners and policy makers several episodes of the fever have shown long term physical and neurological disability besides short term morbidity there is no vaccine available to prevent chikungunya though it is generally considered non fatal hence the disease can be treated at relatively low cost by simple measures to prevent the severity of the disease however poor people treated the diseases relatively costly though the disease was not new to india the disease caused panic among the public and resulted in socio political and medical concern when the epidemic outbreak penetrated fast in to rural and urban areas after 2006 the symptoms side effects and socio economic impacts were not similar in the affected areas in the kanyakumari district of tamil nadu the disease inflicted more among the rural agricultural laborers and tapper workers in rubber plantations resulted in severe loss of employment and productivity the present study is an attempt to analyse the economic impact of chikungunya fever at the household level in kanyakuramari district this report presents the results of the study the economic impact of chikungunya fever on household level in tamil nadu a study in kanyakurmari district this project is undertaken with the financial support from malcolm and elizabeth adisheshaiah trust chennai this financial assistance is gratefully acknowledged i am indebted to presidency college for providing the necessary facilities to undertake the project i fail in my duty if i dont mention the helps extended by the post graduate students of marthandam christian college kanyakumari i am indebted to prof r nagaraj of mids for his valuable guidance in undertaking the project i also gratefully acknowledge the support of mr k sampath kumar b p chandramohan

meta analysis decision analysis and cost effectiveness analysis are the cornerstones of evidence based medicine these related quantitative methods have become essential tools in the formulation of clinical and public policy based on the synthesis of evidence all three methods are taught with

increasing frequency in medical schools and schools of public health and in health policy courses at the undergraduate and graduate level this book is a lucid introduction and will serve the needs of students taking introductory courses that cover these topics it will also be useful to clinicians and policymakers who need to understand the quantitative underpinnings of the methods in order to best apply the information that derives from them the second edition of this popular book adds new material on cumulative meta analysis as a method to explore heterogeneity the coverage of cost effectiveness analysis has been brought into close alignment with recommendations of the u s public health panel on cost effectiveness analysis in health and medicine many of the examples have been replaced with more current examples and all of the material has been updated to reflect recent advances in the methods and the emergence of consensus about some previously controversial issues analysis these three closely related methods have become even more important for synthesizing research since the first edition was published in 1994 and they have gained legitimacy as tools for guiding health policy

cost management measuring monitoring and motivating performance third canadian edition was written to help students learn to appropriately apply cost accounting methods in a variety of organizational settings to achieve this goal students must also develop professional competencies such as strategic critical thinking risk analysis decision making ethical reasoning and communication this is in line with the cpa curriculum and the content of this edition and the problem materials is mapped to the cpa many students fail to recognize the assumptions limitations behavioural implications and qualitative factors that influence managerial decision making the textbook is written in an engaging step by step style that is accessible to students the authors are proactive about addressing the challenges that instructors and students face in their teaching and learning endeavors they utilize features such as realistic examples real ethical dilemmas self study problems and unique problem material structured to encourage students to think about accounting problems and problem solving more complexly

cost management in plastics processing strategies targets techniques and tools fourth edition makes readers think about current practices and how to go forward with effective cost management this is a practical workbook that provides a structured approach to reducing costs in plastics processing for all the major plastics shaping processes moulding extrusion forming as well as elsewhere in the company e g in factory services and non manufacturing areas competition in all manufacturing sectors is increasing and there is continuous pressure to drive costs down and to increase cost management good cost management improves profits and margins improves management control and opens the door to becoming a world class company the approach throughout this book looks rigorously at where costs are incurred and proposes projects and targets for cost reduction this book is designed to provide a well structured map broken down into simple tasks and achievable goals this book offers a structured approach to the techniques of cost management from how costs are calculated by accountants to the effective use of machines and labor to the minimization of waste it begins by looking at traditional methods of accounting and costing and whether these are helpful or accurate for project management practical examples of cost management in plastics processing are included together with many useful flow charts and diagrams to illustrate the

points under discussion enables plastics processors to institute an effective cost management system going beyond simply trying to cut costs provides a holistic perspective on cost management shining a light on areas on costs which may not have previously been considered or accounted for and proposing projects and targets for cost reduction serves as a route map to help companies move toward improved margins and greater profitability

management and cost accounting has been the basic toolbox in business administration for decades today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments at the same time business in general and management accounting in particular is becoming more and more international english clearly has evolved as the lingua franca of international business academics students as well as practitioners exchange their views and ideas discuss concepts and communicate with each other in english this is certainly also true for cost accounting and management accounting management accounting is becoming increasingly international management and cost accounting is a new english language textbook covering concepts and instruments of cost and management accounting at an introductory level bachelor but also suited for mba courses due to strong focus on practical applications and cases this textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in german and central european bachelor classes on cost accounting and management accounting after an introduction to the topic including major differences between the german approach and the purely anglo saxon approach of management accounting the book describes different cost terms and concepts applied in german cost accounting the book is much more specific here compared to us american standard textbooks based on different cost concepts the topic of cost behavior is discussed including the determination of cost functions the heart of the book guides the reader through the general structure of a fully developed cost accounting system following the german and central european standard it starts with cost type accounting moves on to cost center accounting and finally deals with cost unit accounting assigning cost to goods and services offered in the market the remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task a comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions additionally cost volume profit analysis break even analysis is covered the book closes with a comprehensive treatment of cost planning and variance analysis
