how can you become the boss traces the trajectory of knowledge skills and disposition beginning with the ones needed to lead oneself through to leading others to develop the knowledge skills and dispositions to lead themselves and ultimately using that knowledge those skills and dispositions for leading an organization to transformation the goal is being able to lead a party of one before assuming that one can lead others leading an organization means transformation into more of what the organization was intended to be by its vision and mission leaders develop a personal vision and mission use the 168 hours a week that everyone has to produce a result hold a problem solving frame of mind cultivate a desire to learn and productively use self talk ultimately these leaders foster a team approach through a culture of participation they regard leadership as an action rather than a position they see the future of leadership as collective lateral and integral and work with others from an abundance mentality these leaders move forward in learning using neuroscience findings to promote actions grounded in brain research and assuming responsibility as a way of being for the organization

the healthcare system is in need of innovative evidence based thinkers to transform a flawed system and improve healthcare outcomes this book combines the two seemingly opposing concepts of innovation and evidence and provides examples and insights that allow leaders to build capacity for transformation

public sector leaders are currently weighing up heart wrenching decisions to slash public services worth shows that these dilemmas can be avoided without complex change programs expensive projects or extended training courses

in the pursuit of knowledge dorian sagan argues in this dazzlingly eclectic rigorously crafted and deliciously witty collection of essays scientific authoritarianism and philosophical obscurantism are equally formidable obstacles to discovery as science has become more specialized and more costly its questing spirit has been constrained by dogma and philosophy perhaps the discipline best placed to question orthodoxy has retreated behind dense theoretical language and arcane topics of learning guided by a capacious democratic view of science inspired by the examples set by his late parents carl sagan who popularized the study of the cosmos and lynn margulis an evolutionary biologist who repeatedly clashed with the scientific establishment sagan draws on classical and contemporary philosophy to intervene provocatively in often charged debates on thermodynamics linear and nonlinear time purpose ethics the links between language and psychedelic drugs the search for extraterrestrial intelligence and the occupation of the human body

by microbial others informed by a countercultural sensibility a deep engagement with speculative thought and a hardheaded scientific skepticism he advances controversial positions on such seemingly sacrosanct subjects as evolution and entropy at the same time he creatively considers a wide range of thinkers from socrates to bataille and descartes to von uexküll to reflect on sex biopolitics and the free will of kermit the frog refreshingly nonconformist and polemically incisive cosmic apprentice challenges readers to reject both dogma and cliché and instead recover the intellectual spirit of adventure that should and can once again animate both science and philosophy
