for decades there has been considerable interest in the ways that interactions between children can provide a beneficial context for the study of cognitive and social development in this book psaltis and zapiti use both theoretical and empirical research to build on the perspectives of piaget vygotsky moscovici and others including the legacy of gerard duveen to offer a state of the art account of research on the themes of social interaction and cognitive development interaction communication and development discusses the significance of social identities for social interaction and cognitive development the empirical set of studies presented and discussed focus on patterns of communication between children as they work together to solve problems communications are examined in detail with a focus on socio cognitive conflict conversational moves and conversation types the way the different forms of the interactions relate to different sources of asymmetry in the classroom the way social representations and social identities of gender are negotiated in the interaction this book provides an important account of how children develop through different kinds of social interactions it will have considerable appeal for researchers in the fields of developmental psychology socio cultural psychology social representations theory and education who wish to gain a deeper understanding of development and its relation to socio cultural processes

this edited volume recognises the need to cultivate a critical and acute understanding of ai technologies amongst primary and elementary school children enabling them to meet the challenge of a human and ethically oriented management of ai technologies focusing on school settings from both the national and international level to form comparative case studies chapters present a robust conceptual and foundational framework within a global context as the idea of ai and our relationship to it advances apace the book uses research garnered from interviews and observational data qualitative and quantitative research and theoretical findings gathered from single schools or institutions across the world providing an innovative perspective in promoting the importance of a critical creative and ethical orientation based on aesthetic experiences the book focuses on development in areas like visual arts literature environmental education robotics photography and screen education movement and play ultimately the book responds to an urgent and time sensitive call to provide guidance on ai to primary education researchers and will be of interest to academics scholars and researchers in the fields of primary and elementary education technology in education children s rights education and moral and values education more broadly

modern mathematics is constructed rigorously through proofs based on truths which are either axioms or previously proven theorems thus it is par excellence a model of rational inquiry links between cognitive psychology and mathematics education have been particularly strong during the last decades indeed the enlightenment view of the rational human mind that reasons makes decisions and solves problems based on logic and probabilities was shaken during the second half of the twentieth century cognitive psychologists discovered that humans thoughts and actions often deviate from rules imposed by strict normative theories of inference yet these deviations should not be called errors as cognitive psychologists have demonstrated these deviations may be either valid heuristics that succeed in the environments in which humans have evolved or biases that are caused by a lack of adaptation to abstract information formats humans as the cognitive psychologist and economist herbert simon claimed do not usually optimize but rather satisfice even when solving problem this research topic aims at demonstrating that these insights have had a decisive impact on mathematics education we want to stress that we are concerned with the view of bounded rationality that is different from the one espoused by the heuristics and biases program in simon s bounded rationality and its direct descendant ecological rationality rationality is understood in terms of cognitive success in the world correspondence rather than in terms of conformity to content free norms of coherence e g transitivity
