just over one hundred and thirty years ago charles darwin in the descent of man and selection in relation to sex 1871 developed remarkably accurate conclusions about man s ancestry based on a review of general comparative anatomy and psychology in which he regarded sexual selection as a necessary part of the evolutionary process but the attention of biologists turned to the more general concept of natural selection in which sexual selection plays a complex role that has been little understood this volume significantly broadens the scope of modern evolutionary biology by looking at this important and long neglected concept of great importance in this book which is the first full discussion of sexual selection since 1871 leading biologists bring modern genetic theory and behavior observation to bear on the subject the distinguished authors consider many aspects of sexual selection in many species including man within the context of contemporary evolutionary theory and research the result is a remarkably original and well rounded view of the whole concept that will be invaluable especially to students of evolution and human sexual behavior the lucid authority of the contributors and the importance of the topic will interest all who share in man s perennial fascination with his own history the book will be of central importance to a wide variety of professionals including biologists anthropologists and geneticists it will be an invaluable supplementary text for courses in vertebrate biology theory of evolution genetics and physical anthropology it is especially important with the emergence of alternative explanations of human development under the rubric of creationism and doctrines of intelligent design

i ve always enjoyed reading the british social attitudes survey which shows what the british people really think as opposed to what journalists and politicians like to pretend they think john pilger britain is a well documented nation we know a lot about the characteristics of our society who we are and what we do we know much less about what we think and feel about our world and ourselves the indispensable annual british social attitudes survey fills this gap it compiles describes and comments on a range of current social attitudes the information is derived from interviews carried out by the national centre for social research s own interviewers among a nationwide sample of around 3 500 people each year the series seeks to chart changes in british social values over a period of time in relation to other changes in society and is core funded by the gatsby charitable foundation a full report is published each year the 17th report summarizes and interprets data from the most recent survey as well as making comparisons with findings from previous years the data are publicly available through the esrc data archive at the university of essex

this book starts from the discussion of a pornography but does not end with pornography rather it suggests that a pornographic star can be treated as a cultural product which obtains rich cultural meanings it contributes to the debate between the global homogenization paradigm and the creolization paradigm which predominates in multiple disciplines through a thorough examination of the entire process of the cross cultural migration of aoï sola a japanese adult video av actress who has achieved amazing popularity in mainland china since 2010 through fifteen month participant observation inside the two chinese agencies of sola this study reveals that the transformative intermediaries play a significant role in the transformation of the cultural product in the chinese context even though their operations are usually invisible to outsiders the findings challenge the conventional scholarly assumption that foreign

products produced by global producers are consumed directly by local consumers or that the significance of these intermediaries can be ignored this study further extends the participant observation inside the realistic field to the virtual space of media in different countries which can be called the second field it demonstrates that multiple local groups including intermediaries chinese commercial news portals party media and chinese internet users respond to the dominant ideologies in chinese society by reinterpreting sola in different even contradictory ways thus this research refutes the presumption that a local society is a coherent monolith in the acceptance of foreign cultural products the book also deepens the reader s understanding of chinese internet usage
