Architectural Theory Volume II An Anthology From 1871 To Architectural Theory Volume II An Anthology from 1871 to This blog post delves into the second volume of an imagined anthology Architectural Theory spanning the period from 1871 to the present day It aims to explore the evolution of architectural thought examining key themes seminal figures and their contributions to the everchanging landscape of design Architectural Theory 19th Century Architecture 20th Century Architecture Modernism Postmodernism Contemporary Architecture Sustainability Ethics Architectural Theory Volume II picks up where its predecessor left off delving into the tumultuous era of the late 19th and 20th centuries This period witnessed radical shifts in societal values technological advancements and the very definition of what constitutes architecture The anthology serves as a valuable tool for understanding these changes and their profound impact on the built environment Analysis of Current Trends The second volume of Architectural Theory reveals a tapestry of diverse and often conflicting perspectives on the role of architecture in society This period saw the rise of prominent movements such as Modernism Postmodernism and Deconstructivism each offering a unique interpretation of form function and the relationship between architecture and its users Modernism Embracing functionality simplicity and rationality Modernism sought to break away from the ornamentation and historical styles of the past Key figures like Le Corbusier Walter Gropius and Mies van der Rohe championed the use of new materials like steel and glass resulting in iconic buildings that celebrated clean lines and open spaces Postmodernism Emerging as a response to the perceived rigidity and coldness of Modernism Postmodernism embraced playfulness irony and a return to historical elements Architects like Robert Venturi Michael Graves and Philip Johnson challenged the established norms incorporating elements of classical architecture and popular culture into their designs Deconstructivism Pushing the boundaries even further Deconstructivism celebrated fragmentation distortion and a deliberate subversion of traditional architectural principles Leading figures such as Frank Gehry Zaha Hadid and Daniel Libeskind created buildings that challenged

the very notion of form and space embodying a sense of chaos and dynamism Beyond these movements the anthology also highlights the influence of social and political movements on architectural theory The rise of feminism environmentalism and the increasing awareness of social inequalities have prompted architects to address issues of accessibility sustainability and inclusivity in their designs Discussion of Ethical Considerations As architecture increasingly shapes our lives and landscapes Architectural Theory Volume II sheds light on the ethical considerations that accompany its practice Sustainability The anthology explores the critical role of sustainable design principles in addressing the environmental challenges of our time From the use of renewable materials and energyefficient technologies to the creation of buildings that integrate seamlessly with their surroundings architects are taking responsibility for minimizing the environmental impact of their work Social Responsibility Architects are increasingly recognized as powerful agents of social change The anthology delves into the ethical obligation of architects to design buildings that promote social justice accessibility and inclusivity for all members of society This includes addressing issues of affordability equitable distribution of resources and the creation of spaces that foster community engagement and wellbeing Cultural Sensitivity In a globalized world architectural theory has become increasingly aware of the need for cultural sensitivity and respect for diverse traditions The anthology examines how architects can navigate the complexities of different cultural contexts ensuring their designs are respectful of local values customs and heritage Conclusion Architectural Theory Volume II offers a powerful exploration of the evolution of architectural thought from the late 19th century to the present Through its diverse collection of writings the anthology provides a framework for understanding the forces that have shaped the built 3 environment highlighting both the triumphs and challenges faced by architects in their pursuit of innovation sustainability and ethical design By engaging with the past the anthology offers valuable insights for navigating the complex and rapidly changing landscape of contemporary architecture

we are conditioned over time to regard environmental forces such as dust mud gas smoke debris weeds and insects as inimical to architecture much of today's discussion about sustainable and green design revolves around efforts to clean or filter out these primitive elements while mostly the direct result of human habitation these subnatural forces are nothing new in fact our ability to manage these

forces has long defined the limits of civilized life from its origins architecture has been engaged in both fighting and embracing these so called destructive forces in subnature david gissen author of our critically acclaimed big and green examines experimental work by today's leading designers scholars philosophers and biologists that rejects the idea that humans can somehow recreate a purely natural world free of the untidy elements that actually constitute nature each chapter provides an examination of a particular form of subnature and its actualization in contemporary design practice the exhilarating and at times unsettling work featured in subnature suggests an alternative view of natural processes and ecosystems and their relationships to human society and architecture r sie n s mosquito bottleneck house in trinidad uses a skin that actually attracts mosquitoes and moves them through the building while keeping them separate from the occupants in his building designs the architect philippe rahm draws the dank air from the earth and the gasses and moisture from our breath to define new forms of spatial experience in his underground house mollier house and omnisport hall rahm forces us to consider the odor of soil and the emissions from our body as the natural context of a future architecture cero 9 s design for the magic mountain captures excess heat emitted from a power generator in ames iowa to fuel a rose garden that embellishes the industrial site and creates a natural mountain rising above the city's skyline subnature looks beyond leed ratings green roofs and solar panels toward a progressive architecture based on a radical new conception of nature

the pressing economic environmental and social crises emanate the need for a redefinition of the dominant views perspectives and values in the field of architecture the intellectual production of the last two decades has witnessed an impressive number of new design techniques and conceptual displacements reflecting the dynamic and fluid relation between man and his dwelling space however the contemporary market forces are favouring the growth of a star system in architectural production based on technological innovation spectacular imagery and formal acrobatics and are neglecting the social environmental and moral implications of spatial design perhaps the time has come to think anew the possible critical intersections between space and ethos not only as an answer to the negative consequences of modernity but also as a remedy to the negative aspects of globalisation the aim of the present collective volume is to enliven the ethical dimensions and dilemmas of architecture as they are shaped within the complexity of our times on two levels the level of critical and reflective discourse

and the level of social and cultural reality occasioned by post industrial modes of production and new technologies thirteen distinguished academics and researchers investigate the complex relations between architecture space and ethics from divergent and inter disciplinary perspectives philosophy sociology the humanities the arts landscape design environmental design urban design and architectural history and theory
