exciting major changes have occurred in the understanding and treatment of gallstone disease over the last two decades in bygone years books about gallstones were often based on postgraduate lectures which the author usually a surgeon of distinction had given more recently many books dealing with this subject have been based upon national or international conferences the single author text has the disadvantage that few authors today can authoritatively encompass a whole field the reports of symposia conferences or workshops often lack balance and authority the merits of gallstone disease and its management edited by malcolm bateson are clear he has chosen 11 authors all of whom write on topics relating to their own expertise and the content of the book has been carefully planned to reflect the most modern ideas about the aetiology and management of cholesterol gallstones it is worth repeating that we are experiencing rapid developments in the field of gallstone disease disappointingly the least progress has been made in identifying the cause or causes of the disease notwithstanding the many data implicating a variety of environmental factors most of these affect the chemistry of hepatic bile and the contribution of the gallbladder to lithogenesis remains uncertain and unstudied

this monograph mainly covers our studies on the causes and management of the most common and disabling disorders of stress and strain of life it is now well established that the brain with its known centres for sensory intellectual and emotional functions plays the main role in maintaining a balanced condition of our body and mind by liberating required amount of neurohumors and hormones any disturbance of this homeostasis by genetic or environmental factors would ultimately lead to the development of the stress disorders at first the changes are functional and later on bodily changes of stress disorders appear in the treatment during the acute stage the use of tranquillizers and other drugs may help however if the disturbance persists the practice of yoga would help greatly to get over the neuro humoral changes occurring in the brain hence the integrated

practice of yoga has an important role to play in the prevention and treatment of stress diseases all these aspects have been dealt with in the book in sufficient detail with regard to each of the disorders of stress for the benefit of all concerned
