the present volume seeks to contribute some studies to the subfield of empirical translation studies and thus aid in extending its reach within the field of translation studies and thus in making our discipline more rigorous and fostering a reproducible research culture the translation in transition conference series across its editions in copenhagen 2013 germersheim 2015 and ghent 2017 has been a major meeting point for scholars working with these aims in mind and the conference in barcelona 2019 has continued this tradition of

expanding the sub field of empirical translation studies to other paradigms within translation studies this book is a collection of selected papers presented at that fourth translation in transition conference held at the universitat pompeu fabra in barcelona on 19 20 september 2019

the empirical study of law legal systems and legal institutions is widely viewed as one of the most exciting and important intellectual developments in the modern history of legal research motivated by a conviction that legal phenomena can and should be understood not only in normative terms but also as social practices of political economic and ethical significance empirical legal researchers have used quantitative and qualitative methods to illuminate many aspects of law s meaning operation and impact in the 43 chapters of the oxford handbook of empirical legal research leading scholars provide accessible and original discussions of the history aims and methods of empirical research about law as well as its achievements and potential the handbook has three parts the first deals with the development and institutional context of empirical legal research the second and largest part consists of critical accounts of empirical research on many aspects of the legal world on criminal law civil law public law regulatory law and international law on lawyers judicial institutions legal procedures and evidence and on legal pluralism and the public understanding of law the third part introduces readers to the methods of empirical research and its place in the law school curriculum

virtual worlds are places where humans interact and as such they can be environments for research and learning however they are complex and mutable in ways that more controlled and traditional environments are not although computer mediated virtual worlds are multifaceted social systems like the offline world and choosing to study virtual world phenomena demands as much consideration for the

participants the environment and the researcher as offline by exploring virtual worlds as places of research and learning the international practitioners in this book demonstrate the power of these worlds to replicate and extend our arenas of research and learning they focus on process and outcomes and consider questions that arise from engaging in teaching and research in these spaces including new approaches to research ethics internationalization localization and collaboration in virtual worlds this book was originally published as a special issue of learning media technology

statistical models attempt to describe and quantify relationships between variables in the models presented in this chapter there is a response variable sometimes called dependent variable and at least one predictor variable sometimes called independent or explanatory variable when investigating a possible cause and effect type of relationship the response variable is the putative effect and the predictors are the hypothesized causes typically there is a main predictor variable of interest other predictors in the model are called covariates unknown covariates or other independent variables not controlled in an experiment or analysis can affect the dependent or outcome variable and mislead the conclusions made from the inquiry bock velleman de veaux 2009 a p value p measures the statistical significance of the observed relationship given the model p is the probability that a relationship is seen by mere chance the smaller the p value the more confident we can be that the pattern seen in the data is not random in the type of models examined here the r measures the proportion of the variation in the response variable that is explained by the predictors specified in the model if r is close to 1 then almost all the variation in the response variable has been explained this measure is also known as the multiple correlation coefficient statistical studies can be grouped into two types experimental and observational
