arguing that the commercial stage depended on the unprecedented demographic growth and commercial vibrancy of London to fuel its own development. Jean E. Howard posits a particular synergy between the early modern stage and the city in which it flourished in London. Comedy place functions as the material arena in which social relations are regulated, urban problems negotiated, and city space rendered socially intelligible rather than simply describing London. The stage participated in interpreting it and giving it social meaning. Each chapter of this book focuses on a particular place within the city: the Royal Exchange, the Counters, London's warehouses, and its academies of manners, and examines the theater's role in creating distinctive narratives about each. In these stories, specific locations are transformed into venues defined by particular kinds of interactions, whether between citizen and alien, debtor and creditor, prostitute and client, or dancing master and country gentleman. Collectively, they suggest how city space could be used and by whom, and they make place the arena for addressing pressing urban problems: demographic change and the influx of foreigners and strangers into the city, new ways of making money and losing it, changing gender roles within the metropolis, and the rise of a distinctive town culture in the West End. Drawing on a wide range of familiar and little studied plays from four decades of a defining era of theater history, *Theater of a City* shows how the stage imaginatively shaped and responded to the changing face of early modern London.

In 2009, after seismic tremors struck the Italian mountain town of L'Aquila, survivors were subjected to a second earthquake, invasive media attention, and a relief effort that left them in a state of suspended citizenship as they were forcibly resettled and had to envision a new future in citizens without a city. Jan Jonathan Bock reveals how a disproportionate government response exacerbated survivors' sense of crisis, divided the local population, and induced new types of political action. Italy's disenfranchising emergency reaction relocated citizens to camps and sites across a ruined townscape without a plan for restoration or return. Through grassroots politics, arts, and culture commemoration rituals, architectural projects, and legal avenues, local people now sought to shape their hometown's recovery. Bock combines an analysis of the catastrophe's impact with insights into post-disaster civic life, urban heritage, the politics of mourning, and community

this edited collection will examine the way in which cities are imagined experienced and shaped by those who reside within them those who manage or govern them and those who as visitor tourist or

traveller pass through them attention will be paid to the influence that these various inhabitants have on city life and living and the dialectic that exists between their sometimes collective and sometimes divergent perceptions and uses of city space in conjunction with this the collection will explore the ways in which local culture and cultural policy are used by public and private interests as the framework for changing the image and amenity of the city in order to raise its profile and attract tourists the book contributes to discussions of the increasingly high profile place that cultural programs have in urban regeneration initiatives and explore the tensions conflicts and negotiations that emerge in urban spaces as a result of policy and culture coming together papers will be sought from researchers around the world with a view to examining the nexus between tourism leisure and cultural programming from a number of perspectives and with reference to a range of international case studies this book was published as a special issue of the journal of policy research in tourism leisure and events

shows how digital media connects people to their lived environments every day millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit they may share texts or images of themselves and these places en route or after their journey is complete we don't consciously reflect on these activities and probably don't associate these practices with constructing a sense of place critics have argued that digital media alienates users from space and place but this book argues that the exact opposite is true that we habitually use digital technologies to re-embed ourselves within urban environments the digital city advocates for the need to rethink our everyday interactions with digital infrastructures navigation technologies and social media as we move through the world drawing on five case studies from global and mid-sized cities to illustrate the concept of re-placing germaine halegoua shows how different populations employ urban broadband networks social and locative media platforms digital navigation smart cities and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments through timely narratives of everyday urban life halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to

understanding contemporary relationships with digital media

we live in a self proclaimed urban age where we celebrate the city as the source of economic prosperity a nurturer of social and cultural diversity and a place primed for democracy we proclaim the city as the fertile ground from which progress will arise without cities we tell ourselves human civilization would falter and decay in cities in the urban age robert a beauregard argues that this line of thinking is not only hyperbolic it is too celebratory by half for beauregard the city is a cauldron for four haunting contradictions first cities are equally defined by both their wealth and their poverty second cities are simultaneously environmentally destructive and yet promise sustainability third cities encourage rule by political machines and oligarchies even as they are essentially democratic and at least nominally open to all and fourth city life promotes tolerance among disparate groups even as the friction among them often erupts into violence beauregard offers no simple solutions or proposed remedies for these contradictions indeed he doesn't necessarily hold that they need to be resolved since they are generative of city life without

these four tensions cities wouldn't be cities rather Beauregard argues that only by recognizing these ambiguities and contradictions can we even begin to understand our moral obligations as well as the clearest paths toward equality justice and peace in urban settings
