research has shown that the camel is the most efficient domestic animal for converting vegetative matter into work milk and meat camel milk is already used for human consumption in its fresh or fermented forms or as butter but only rarely as cheese camel milk is more technically difficult to process than milk from other domestic animals and some researchers have even claimed that camel milk cheese would be impossible to produce however if normal cheese making procedures are adapted to camel milk s particular characteristics satisfactory cheeses can be made the technology of making cheese from camel milk describes the composition of camel milk compares it with other milks and explains how it can be used to make cheese

the poultry production systems of africa are mainly based on the scavenging

indigenous chickens found in virtually all villages and households in rural africa these systems are characterized by low output per bird nevertheless over 70 percent of the poultry products and 20 percent of animal protein intake in most african countries come from this sector therefore increased rural poultry production would result in a positive impact on household food security both in increased dietary intake and in income generation this study coincided with the world food summit held at fao rome from 13 to 17 november 1996 where delegations committed their governments and civil society to a global attack on food insecurity and poverty poultry like other short cycle animal stock is viewed by the fao special programme for food security spfs as a crucial element in the struggle for sustained food production and poverty alleviation the guidelines provided in this study are particularly pertinent to those countries participating in the spfs where village chicken production will have a substantial impact on increased household food security and gender equity foreword
