an illustrated monthly

in her introduction tymieniecka states the core theme of the present book sharply is culture an excess of nature s prodigious expansiveness an excess which might turn out to be dangerous for nature itself if it goes too far or is culture a natural congenial prolongation of nature life if the latter then culture is assimilated into

nature and thus would lose its claim to autonomy its criteria would be superseded by those of nature alone of course nature and culture may both still be seen as being absorbed by the inner powers of specifically human inwardness on which view human being caught in its own transcendence becomes separated radically in kind from the rest of existence and may not touch even the shadow of reality except through its own prism excess therefore or prolongation and on what terms the relationship between culture and nature in its technical phase demands a new elucidation here this is pursued by excavating the root significance of the multiple rationalities of life in contrast to husserl who differentiated living types according to their degree of participation in the world the phenomenology of life disentangles living types from within the onto-poietic web of life itself the human creative act reveals itself as the great divide of the logos of life a divide that does not separate but harmonizes thus dispelling both naturalistic and spiritualistic reductionism

alchemy and amalgam explores a relatively un researched area of the baudelairean corpus his translations from english and relates them to the rest of his works it seeks to establish a link between translational and creative writing arguing for a reassessment of the place of translation in baudelaire s writing method rather than a sideline in baudelaire s creative activities translation is thus shown to be a central form of dual writing at the core of his works baudelaire s translations from english his constant rewriting of pre existing material including his own the doublets the transpositions d art and the art criticism are all based on an approach to writing which is essentially derivative but also transformative thus the baudelairean experiment illustrates the limits of romantic notions of originality creativity and genius reminding us that all writing is intrinsically

intertextual it also shows the complexity of translation as a form of creation at the core of modern writing the book is one of the first of its kind to link the study the translational activity of a major writer to his creative writings it is also one of the first to provide an integrated presentation of french 19th century translation approaches and to link them to questions of copyright and authorship in the context of the rise of capitalism and romantic views of creation and genius it offers therefore a new perspective both on translation history and on literary history alchemy and amalgam will be of interest to students of translation comparative literature and french studies
