despite overpopulation and almost no natural resources south korea has consistently boasted one of the world s fastest growing economies and is now the sixth largest exporter and ninth largest importer in the world this book is the first comprehensive resource in english to address the international demand for detailed guidance for lawyers advising investors on conducting business in south korea it provides not only a thorough description of korean corporation law but also in depth

summaries and analyses of over 200 leading cases of the korean supreme court the author s fine grained coverage explains and clarifies the interpretation on all the topics of korean corporation law including the following types of corporations shares share certificate register of shareholders officers auditors small scale corporations accounting squeeze out mergers and organizational change limited partnerships and limited liability corporations foreign corporations and criminal penalties each of the cases analyzed has been selected to discuss a commonly occurring contentious issue in south korea s corporation law as more and more international enterprises invest in and work with south korea this peerless work with its unmatched practical information and insight into the key cases affecting south korean corporation law proves to be of immeasurable value to lawyers and in house counsel of transnational corporations it is also an essential volume for any academic research into matters concerned with investment in that country

this book discusses the intensification of international transport services as the consequence of an increasingly capillary economic integration in particular in some european countries such as belgium the rhine area of germany and denmark the application of the geneva convention on the carriage of goods from the case law point of view is even more thorough than that of national law even though this is not the case for all countries the geneva convention is a core text both for the scientific debates on the issue and for commercial operators therefore proposing an up to date reading of the convention is of utmost importance from the practical point of view especially considering that thanks to the consistent application of the international carriage of goods by road contract the convention has become an essential prerequisite for the development of traffic in ten chapters this book reviews the convention s structure and considers the case law approaches and trends of most countries belonging to the european union it covers contracts and different negotiating models as well as compensation liability of the carrier and damages

during the 1970s renewed interest in plant mechanical signaling led to the discovery that plants subjected to mechanical stimulation develop shorter and thicker axes than undisturbed plants a syndrome called thigmomorphogenesis currently mechanosensing is being intensively studied because of its involvement in many physiological processes in plants and

particularly in the control of plant morphogenesis from an ecological point of view the shaping of plant architecture has to be precisely organized in space to ensure light capture as well as mechanical stability in natural environments terrestrial plants are subjected to mechanical stimulation mainly due to wind but also due to precipitation while aquatic and marine plants are subjected to current and wave energy plants acclimate to mechanically challenging environments by sensing mechanical stimulations and modifying their growth in length and diameter and their tissue properties to reduce potential for buckling or breakage from a morphogenetic point of view both external and internal mechanical cues play an important role in the control of cell division and meristem development likely by modulating microtubule orientation how mechanical stimulations are being sensed by plants is an area of intense research different types of mechanosensors have been discovered or proposed including ion channels gated by membrane tension stretch activation and plasma membrane receptor like kinases that monitor the cell wall deformations electrophysiologists have measured the conductances of some stretch activated channels and have showed that sac of different structures can exhibit different conductances the role of these differences in conductance has not yet been established once a mechanical stimulus has been perceived it must be converted into a biological signal that can lead to variations of plant phenotype calcium has been shown to function as an early second messenger tightly linked with changes in cytosolic and apoplastic ph transcriptional analyses of the effect of mechanical stimulation have revealed a considerable number of differentially expressed genes some of which appear to be specific to mechanical signal transduction these genes can thus serve as markers of mechanosensing for example in studies attempting to define signalling threshold or variations of mechanosensitivity accommodation quantitative biomechanical studies have lead to a model of mechanoperception which links mechanical state and plant responses and provides an integrative tool to study the regulation of mechanosensing this model includes parameters sensitivity and threshold that can be estimated experimentally it has also been shown that plants are desensitized when exposed to multiple mechanical signals as a function of their mechanical history finally mechanosensing is also involved in osmoregulation or cell expansion the links between these different processes involving mechanical signalling need further investigation this frontier research topic provides an overview of the different aspects of mechanical signaling in plants spanning perception effects on plant growth and morphogenesis and broad

this paper discusses the economic performance of denmark although denmark has a longstanding track record of sound economic and social policies economic performance has been relatively weak for an extended period the economy continues to grow slowly after recording 1.3 percent growth in 2014 the economy grew by 1.2 percent in 2015 driven mostly by private consumption on the back of rising employment and real incomes however relatively strong performance in the first half of the year was partly undone by flagging exports in the second half of the year denmark has consistently run current account surpluses in recent decades mostly reflecting structurally high retirement savings in the context of its funded pension system

the research handbook on state aid in the banking sector brings together experts in state aid and in financial regulation drawn from legal academia legal practice economics and from the eu and eea institutions to shed light on this relationship the editors and expert contributors do this by elucidating key concepts that underpin the application of state aid law to banks and by considering specific aspects of the interface between state aid and financial regulation the handbook's analysis is complemented by a number of key country based case studies and by a concluding section which takes stock of the banking union's package of legislative regulatory reforms and reflects on the possible future role of state aid in this sector

freedom of speech in international law charts the minimum protections for speech enshrined in international human rights law it not only addresses the problems facing free speech today but offers recommendations to give effect to the international law obligation to protect freedom of expression

analytical solutions to the orbital motion of celestial objects have been nowadays mostly replaced by numerical solutions but they are still irreplaceable whenever speed is to be preferred to accuracy or to simplify a dynamical model in this book the most common orbital perturbations problems are discussed according to the lie transforms method which is the de facto standard in analytical orbital motion calculations due to an oversight an error slipped in section 4.1 of the book where it is implicitly assumed the case of the kepler problem the following text should replace sections 4.1 and 4.2 of the book cross
