despite the economic boom of the 1990s the gap between the wealthy and the poor in the united states is growing larger while ample evidence exists to validate perceived trends in wage income and overall wealth disparity there is little agreement on the causes of such inequality and what might be done to alleviate it this volume draws together a panel of distinguished scholars who address these issues in terms comprehensible to noneconomists their findings are surprising suggesting that factors such as trade imbalances immigration rates and differences in educational resources do not account for recent increases in the inequality of wealth and earnings rather the contributors maintain that these discrepancies can be attributed to workplace demand for high skilled labor they also insist that further research must examine the organization of industry in order to better understand the concurrent devaluation of manual labor addressing a topic that is of considerable public interest this collection helps move the issue of increasing economic inequality in america to the center of the public policy arena contributors donald r deere claudia goldin lawrence f katz james p smith franco peracchi gary solon eric a hanushek julie a somers marvin h kosters william cline finis welch angus deaton charles murray kevin murphy
