the volume includes a set of selected papers extended and revised from the i2009 pacific asia conference on knowledge engineering and software engineering keso 2009 was held on december 19 20 2009 shenzhen china volume 1 is to provide a forum for

researchers educators engineers and government officials involved in the general areas of computer and software engineering to disseminate their latest research results and exchange views on the future research directions of these fields 140 high quality papers are included in the volume each paper has been peer reviewed by at least 2 program committee members and selected by the volume editor prof yanwen wu on behalf of this volume we would like to express our sincere appreciation to all of authors and referees for their efforts reviewing the papers hoping you can find lots of profound research ideas and results on the related fields of computer and software engineering

this book presents proceedings of the international conference on intelligent systems and networks icisn 2022 held at hanoi in vietnam it includes peer reviewed high quality articles on intelligent system and networks it brings together professionals and researchers in the area and presents a platform for exchange of ideas and to foster future collaboration the topics covered in this book include foundations of computer science computational intelligence language and speech processing software engineering software development methods wireless communications signal processing for communications electronics track iot and sensor systems embedded systems etc

ancient ethical theories based on the notions of virtue and happiness have struck many as an attractive alternative to modern theories but we cannot find out whether this is true until we understand ancient ethics and to do this we need to examine the basic structure of ancient ethical theory not just the details of one or two theories in this book annas brings together the results of a wide ranging study of ancient ethical philosophy and presents it in a way that is easily accessible to anyone with an interest in ancient or modern ethics she examines the fundamental notions of happiness and virtue the role of nature in ethical justification and the relation between concern for self and concern for others her careful examination of the ancient debates and arguments shows that many widespread assumptions about ancient ethics are quite mistaken ancient ethical theories are not egoistic and do not depend for their acceptance on

metaphysical theories of a teleological kind most centrally they are recognizably theories of morality and the ancient disputes about the place of virtue in happiness can be seen as akin to modern disputes about the demands of morality
