overdressed does for t shirts and leggings what fast food nation did for burgers and fries katha pollitt cheap fashion has fundamentally changed the way most americans dress stores ranging from discounters like target to traditional chains like jcpenney

now offer the newest trends at unprecedentedly low prices and we have little reason to keep wearing and repairing the clothes we already own when styles change so fast and it's cheaper to just buy more. Cline sets out to uncover the true nature of the cheap fashion juggernaut: what are we doing with all these cheap clothes and more important, what are they doing to us, our society, our environment and our economic well-being?

Drawing on empirical research, clinical case material and vivid examples from modern culture, *The Psychology of Overeating* demonstrates that overeating must be understood as part of the wider cultural problem of consumption and materialism, highlighting modern society's pathological need to consume. Kima Cargill explores how our limitless consumer culture offers an endless array of delicious food as well as easy money whilst obscuring the long-term effects of overconsumption. The book investigates how developments in food science, branding and marketing have transformed western diets and how the food industry employs psychology to trick us into eating more and more and why we let them. Drawing striking parallels between big food and big pharma, Cargill shows how both industries use similar tactics to manufacture desire, resist regulation and convince us that the solution to overconsumption is further consumption. Real-life examples illustrate how loneliness, depression and lack of purpose help to drive consumption and how this is attributed to individual failure rather than wider culture. The first book to introduce a clinical and existential psychology perspective into the field of food studies, Cargill's interdisciplinary approach bridges the gulf between theory and practice. Key reading for students and researchers in food studies, psychology, health and nutrition and anyone wishing to learn more about the relationship between food and consumption.
