in this lavishly illustrated and arresting study warwick ball presents the story of rome s overwhelming fascination with the east through a coverage of the historical architectural and archaeological evidence unparalleled in both breadth and detail this was a fascination of the new world for the old and of the mundane for the exotic a love affair that took literal form in the story of antony and cleopatra from rome s legendary foundation by aeneas and the trojan heroes as the new troy through the installation of arabs as roman emperors to the eventual foundation of the new rome by a latter day aeneas at constantinople the east took over rome and rome eventually ditched europe to the barbarians rome in the east overturns the received wisdom about rome as the bastion of european culture newly available in paperback and illustrated with almost 300 photographs plans and drawings its accessible and comprehensive approach makes it an ideal resource for both the academic and general reader

the study presents a critical analysis of the political relations between rome and near eastern kingdoms and principalities during the age of civil war from the death of julius caesar in 44 to mark antony s defeat at actium in 31 bc by examining each bilateral relationship separately it argues that those relations were

marked by a large degree of continuity with earlier periods circumstances connected to the civil war had only a limited impact on the interstate conduct of the period despite the effects that the strife had on rome s domestic politics and the res publica the ever present rival parthia and its external policies were more influential in steering the relations between rome and near eastern powers

a detailed archaeological study of life in egypt s eastern desert during the roman period by a leading scholar rome in egypt s eastern desert is a two volume set collecting h    ne cuvigny s most important articles on egypt s eastern desert during the roman period the excavations she directed uncovered a wealth of material including tens of thousands of texts written on pottery fragments ostraca some are administrative texts but many more are correspondence both official and private written by and to the people mostly but not all men who lived and worked in these remote and harsh environments supported by an elaborate network of defense administration and supply that tied the entire region together the contents of rome in egypt s eastern desert have all been published earlier in peer reviewed venues but most appear here for the first time in english all of the contributions have been checked or translated by the editor and brought up to date with respect to bibliography and some have been significantly rewritten by the author in order to take account of the enormous amount of new material discovered since the original publications a full index makes this body of work far more accessible than it was before this book assembles into one collection thirty years of detailed study of this material conjuring in vivid detail the lived experience of those who inhabited these forts often through their own expressive language and the realia of desert geography military life sex religion quarry operations and imperial administration in the roman world

the crisis of the third century saw rome not only embroiled in contests of succeeding short lived emperors but assailed by an increasing variety of hostile peoples from outside its frontiers owing to the complex racial interplay of this

period the sources for its history have to be compiled from a wide variety of sources the least adequate are those in latin the imperial lives of the historia augusta these have to be supplemented by the greek chronicles of zosimus and john malalas of antioch as well as the armenian history of moyses of chorene the arabic history of the arabs of al tabari as well as inscriptions in greek latin hebrew syrian and other languages this volume collects these diverse sources for the first time in english translation and will be a uniquely valuable resource for scholars working on a period of roman history that is attracting increasing attention

this study develops a methodology for approaching homilies that draws on a broader understanding of audience as both the physical audience and the readership of sermons it then offers a case study on the syriac preacher jacob of serguh whose metrical homilies form one of the largest sermon collections in any language from late antiquity

the last longest and most damaging of the wars fought between east rome and sasanian persia 603 628 brought the classical phase of west eurasian history to a dramatic close despite its evident significance not least as the distant setting for muhammad s prophetic mission this last great war of antiquity attracted comparatively little scholarly attention until the last decades of the twentieth century james howard johnston s contributions to the subject most of which were published in out of the way places one that on al tabari is printed for the first time are brought together in convenient form in this volume they strive to root history in close observation of landscape and monuments as well as careful analysis of texts they explore the evolving balance of power between the two empires look at events through roman armenian and arab eyes and home in on the climax of the final conflict in the 620s

this military history of ancient rome analyses the empire s revitalized push against rising enemies to the east in the century since rome s defeat of the seleucid empire in the 180s bc the east was dominated by the rise of new empires parthia armenia and pontus each vying to recreate the glories of the persian empire by the 80s bc the pontic empire of mithridates had grown so bold that it invaded and annexed the whole of rome s eastern empire and occupied greece itself but as rome emerged from the devastating effects of the first civil war a new breed of general emerged with it eager to re assert roman military dominance and carve out a fresh empire in the east in rome s great eastern war gareth c sampson analyses the military campaigns and battles between a revitalized rome and the various powers of the eastern mediterranean hinterland he demonstrates how this series of conflicts ultimately heralded a new phase in roman imperial expansion and reshaped the ancient east

one of the most significant transformations of the roman world in late antiquity was the integration of barbarian peoples into the social cultural religious and political milieu of the mediterranean world the nature of these transformations was considered at the sixth biennial shifting frontiers in late antiquity conference at the university of illinois at urbana champaign in march of 2005 and this volume presents an updated selection of the papers given on that occasion complemented with a few others these 25 studies do much to break down old stereotypes about the cultural and social segregation of roman and barbarian populations and demonstrate that contrary to the past orthodoxy romans and barbarians interacted in a multitude of ways and it was not just barbarians who experienced ethnogenesis or cultural assimilation the same romans who disparaged barbarian behavior also adopted aspects of it in their everyday lives providing graphic examples of the ambiguity and negotiation that characterized the integration of romans and barbarians a process that altered the concepts of identity of both populations the resultant late antique polyethnic cultural world with cultural frontiers between romans and barbarians that became increasingly

permeable in both directions does much to help explain how the barbarian settlement of the west was accomplished with much less disruption than there might have been and how barbarian populations were integrated seamlessly into the old roman world

the roman near east has been a source of fascination and exasperation an immense area a rich archaeological heritage as well as documents in several local languages a region with a great depth of urbanisation and development yet relatively neglected by modern researchers and difficult to work on and in local archaeologists are often under funded and the roman period viewed as an earlier phase of western colonialism happily the immense surge in archaeological and historical research on the roman period everywhere has included the roman near east and there have been significant academic developments this collection of studies on the roman near east represents professor kennedy s academic assessment of the region which began with his doctoral thesis on the contribution of syria to the roman army although the thesis was never published several articles owe their genesis to work done then or soon after and are included here vi vii ix xii initial visits to military sites in syria and jordan swiftly brought out the presence in many cases of associated civil settlements and though often now gone the traces of ancient field systems hence the two prominent sub themes in this collection are the roman military and various aspects of society and settlement settlement types farming logistical underpinning and communications

this volume completes the three volume collection of fergus millar s essays which together with his books transformed the study of the roman empire by shifting the focus of inquiry onto the broader mediterranean world and beyond the eighteen essays presented here include millar s classic contributions to our understanding of the impact of rome on the peoples cultures and religions of the eastern mediterranean and the extent to which graeco roman culture acted as a vehicle for the self expression of the indigenous cultures in an epilogue written to

conclude the collection millar argues for rethinking the focus of ancient history itself and for considering the levant and the eastern mediterranean from the first millennium b c to the islamic conquests a valid scholarly framework and an appropriate educational syllabus for the study of antiquity english translations of extended ancient passages in greek latin and semitic languages in all the essays make millar s most important articles accessible for the first time to specialists and nonspecialists alike

second volume of a systematic and up to date account of roman warfare from the late republic to justinian

capture s the essence of the struggle within rome for reform and power and dominance a page turner of a book that offers fresh insight firetrench following the first civil war the roman republic was able to rebuild itself and restore stability yet the problems which had plagued the previous seventy years of the republic of political reform being met with violence and bloodshed had not been resolved and once again resumed men such as catiline and clodius took up the mantle of reform which saw rome paralyzed with domestic conflict and ultimately carnage and murder in the search for stability the roman system produced a series of military dynasts men such as pompey crassus and caesar ultimately this led to the republic s collapse into a second and third civil war and the end of the old republican system in its place was the principate a new republic founded on the promise of peace and security at home and an end to the decades of bloodshed garth sampson analyses the various reforming politicians their policies and opponents and the conflicts that resulted he charts the republic s collapse into further civil wars and the new system that rose from the ashes sampson has obviously done a huge amount of research and yet managed to turn what could be a dry subject into an interesting tale of men battling for control far more exciting than game of thrones and with added gladiators army rumour service arrse

what changes in the material culture can we observe when a state is overwhelming a local population with soldiers katoikoi and civil officials or merchants what were the mutual influences between native and colonial cultures this collection addresses these questions and many more focusing on the hellenistic and roman east

this book presents a new history of the leadership organization and disposition of the field armies of the east roman empire between julian 361 363 and herakleios 610 641 to date scholars studying this topic have privileged a poorly understood document the notitia dignitatum and imposed it on the entire period from 395 to 630 this study by contrast gathers all of the available narrative legal papyrological and epigraphic evidence to demonstrate empirically that the notitia system emerged only in the 440s and that it was already mutating by the late fifth century before being fundamentally reformed during justinian s wars of reconquest this realization calls for a new revised history of the eastern armies every facet of military policy must be reassessed often with broad implications for the period the volume provides a new military narrative for the period 361 630 and appendices revising the prosopography of high ranking generals and arguing for a later notitia

most of the everyday writing from the ancient world that is informal writing not intended for a long life or wide public distribution has perished reinterpreting the silences and blanks of the historical record leading papyrologist roger s bagnall convincingly argues that ordinary people from britain to egypt to afghanistan used writing in their daily lives far more extensively than has been recognized marshalling new and little known evidence including remarkable graffiti recently discovered in smyrna bagnall presents a fascinating analysis of writing in different segments of society his book offers a new picture of literacy in the ancient world in which aramaic rivals greek and latin as a great international language and in which many other local languages develop means of written expression alongside
