The F-89 Scorpion was the first multi seat all weather jet interceptor in the U.S. Air Force. It also became the first aircraft ever equipped with a nuclear air to air weapon. The 15 kiloton Genie missile the F-89 made its debut in 1948. It joined the Air Force in 1950 and then served as the mainstay of Air Defense Command for 17 years. Over 1,000 F-89s were produced including 350 of the J model equipped with pylons to carry the Genie. One F-89 did fire the missile as part of Operation Plumbob in 1957. Originally printed by Northrop and the USAF, this F-89 flight operating manual taught pilots everything they needed to know before entering the cockpit. Classified restricted, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to preserve the integrity of the text.

The entry into force and implementation of the global maritime distress and safety system GMDSS between 1992 and 1999 was the most far reaching development in maritime emergency assistance since the invention of the radio. The GMDSS manual presents the principles on which the GMDSS is based, the requirements for its implementation, the standards to be met by GMDSS equipment and the method of operation of the various radio services which make up the GMDSS. The annexes give comprehensive information on all aspects of the GMDSS including primary texts such as relevant texts of the 1974 SOLAS Convention relevant to the GMDSS, relevant IMO Assembly resolutions, MSC and COM circulars.
